The Shareholders, Boards of Commissioners and Directors

PT Indah Kiat Pulp & Paper Tbk

We have audited the accompanying consolidated financial statements of PT Indah Kiat Pulp & Paper Tbk (the "Company") and its Subsidiaries, which comprise the consolidated statement of financial position as of March 31, 2021, and December 31, 2020 and 2019, and the consolidated statements of profit or loss and other comprehensive income, changes in equity, and cash flows for the three-month period ended March 31, 2021, and the years ended December 31, 2020 and 2019, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of such consolidated financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on such consolidated financial statements based on our audit. We conducted our audit in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether such consolidated financial statements are free from material misstatement.

Y. SANTOSA DAN REKAN

Suatu audit melibatkan pelaksanaan prosedur untuk memperoleh bukti audit tentang angka-angka dan pengungkapan dalam laporan keuangan. Prosedur yang dipilih bergantung pada pertimbangan auditor, termasuk penilaian atas risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan maupun kesalahan. Dalam melakukan penilaian risiko tersebut, auditor mempertimbangkan pengendalian internal yang relevan dengan penyusunan dan penyajian wajar laporan keuangan entitas untuk merancang prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektivitasan pengendalian internal entitas. Suatu audit juga mencakup pengevaluasian atas ketepatan kebijakan akuntansi yang digunakan dan kewajaran estimasi akuntansi yang dibuat oleh manajemen, serta pengevaluasian atas penyajian laporan keuangan secara keseluruhan.

Kami yakin bahwa bukti audit yang telah kami peroleh adalah cukup dan tepat untuk menyediakan suatu basis bagi opini audit kami.

Opini

Menurut opini kami, laporan keuangan konsolidasian terlampir menyajikan secara wajar, dalam semua hal yang material, posisi keuangan konsolidasian PT Indah Kiat Pulp & Paper Tbk dan Entitas Anaknya tanggal 31 Maret 2021, dan 31 Desember 2020 dan 2019, serta kineria keuangan dan arus kas konsolidasiannya untuk periode tiga bulan yang berakhir pada tanggal 31 Maret 2021 dan tahun yang berakhir pada tanggal-tanggal 31 Desember 2020 dan 2019, sesuai dengan Standar Akuntansi Keuangan di Indonesia.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of PT Indah Kiat Pulp & Paper Tbk and its Subsidiaries as of March 31, 2021, and December 31, 2020 and 2019, and their consolidated financial performance and cash flows for the three-month period ended March 31, 2021 and the years ended December 31, 2020 and 2019, in accordance with Indonesian Financial Accounting Standards.

Subsequent Measurement

Financial assets at amortized cost

Financial assets are classified as financial assets measured at amortized cost where the financial assets are held within the business model whose objective is to hold financial assets in order to collect contractual cash flows. Financial assets measured at amortized cost are recognised initially at fair value plus transaction costs and subsequently measured at amortized cost using the effective interest rate method.

Financial assets at FVTPL

Financial assets are classified as at FVTPL if those financial assets do not meet the criteria for financial assets measured at amortized cost and FVOCI.

Impairment of Financial Assets

At each reporting date, the Company and Subsidiaries assess whether the credit risk on a financial instrument has increased significantly since initial recognition. When making the assessment, the Company and Subsidiaries use the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company and Subsidiaries compare the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition, considering reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions, which is indicative of significant increases in credit risk since initial recognition.

The Company and Subsidiaries apply a simplified approach to measure expected credit loss.

Derecognition of Financial Assets

The Company and Subsidiaries derecognize financial assets if, and only if: the contractual rights to the cash flows from the financial asset expire; or the contractual rights to receive the cash flows of the financial asset are transferred; or the contractual rights to receive the cash flows of the financial asset are retained but a contractual obligation is assumed to pay those cash flows to one or more recipients in an arrangement that meets certain conditions. When the Company and Subsidiaries transfer a financial asset, it evaluates the extent to which it retains the risks and rewards of ownership of the financial asset.

2. Financial Liabilities

Initial Recognition

The Company and Subsidiaries determine the classification of their financial liabilities at initial recognition. The Company and Subsidiaries classify all of their financial liabilities into financial liabilities measured at amortized cost, which are recognized initially at fair value and inclusive of directly attributable transaction costs.

As of March 31, 2021, December 31, 2020 and 2019, the Company and Subsidiaries' financial liabilities consist of liabilities at amortized cost (Note 44).

Subsequent Measurement

After initial recognition, financial liabilities in this category are subsequently measured at amortized cost using the effective interest method. The amortization of the effective interest rate is included in finance costs in the profit or loss.

Derecognition of Financial Liabilities

The Company and Subsidiaries derecognize financial liabilities if, and only if, the Company and Subsidiaries' obligations are discharged, cancelled or expire.

3. Saling Hapus Instrumen Keuangan

Aset keuangan dan liabilitas keuangan saling hapus dan jumlah netonya dilaporkan dalam laporan posisi keuangan konsolidasian jika, dan hanya jika, saat ini memiliki hak yang berkekuatan hukum untuk melakukan saling hapus atas total yang telah diakui dan terdapat niat untuk menyelesaikannya secara neto, atau untuk merealisasikan aset dan menyelesaikan liabilitasnya secara simultan.

4. Instrumen Keuangan yang Diukur pada Biaya Perolehan Diamortisasi

Biaya perolehan diamortisasi dihitung menggunakan metode suku bunga efektif dikurangi dengan penyisihan atas penurunan nilai dan pembayaran pokok atau nilai yang tidak dapat ditagih. Perhitungan tersebut mempertimbangkan premium atau diskonto pada saat perolehan dan termasuk biaya transaksi dan biaya yang merupakan bagian yang tidak terpisahkan dari suku bunga efektif.

Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi arus kas masa datang selama perkiraan umur dari instrumen keuangan, atau jika lebih tepat, digunakan periode yang lebih singkat, untuk jumlah tercatat neto instrumen keuangan. Total bunga berdasarkan penerapan metode suku bunga efektif diakui sebagai penghasilan atau beban bunga.

g. Persediaan

Persediaan dinyatakan sebesar nilai yang lebih rendah antara biaya perolehan atau nilai realisasi neto (the lower of cost or net realizable value). Biaya perolehan ditentukan dengan metode rata-rata tertimbang (weighted-average method). Biaya barang jadi yang diproduksi dan barang dalam proses termasuk alokasi sistematis overhead produksi. Nilai realisasi neto adalah estimasi harga jual dalam kegiatan usaha biasa dikurangi estimasi biaya penyelesaian dan estimasi biaya yang diperlukan untuk membuat penjualan. Penyisihan persediaan usang ditentukan berdasarkan hasil penelaahan atas keadaan persediaan pada tiap akhir periode pelaporan.

h. Beban Dibayar Dimuka

Beban dibayar dimuka diamortisasi selama masa manfaat masing-masing biaya.

3. Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statements of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

4. Financial Instruments Measured at Amortized Cost

Amortized cost is computed using the effective interest rate method less any allowance for impairment and principal repayment or reduction. The calculation takes into account any premium or discount on acquisition and includes transaction costs and fees that are an integral part of the effective interest rate.

The effective interest rate is the rate that exactly discounts estimated future cash flows through the expected life of the financial instrument or when appropriate, a shorter period, to the net carrying amount of the financial instrument. The interest amount based on the application of the effective interest method is recognized as interest income or expense.

g. Inventories

Inventories are valued at the lower of cost or net realizable value. Cost is determined using the weighted-average method. Cost of finished goods produced and work in process includes a systematic allocation of production overheads. Net realizable value is the estimated selling price in the ordinary course of business less applicable estimated costs of completion and estimated costs necessary to make the sale. Allowance for inventory obsolescence is provided based on a review of the condition of inventories at the end of each reporting period.

h. Prepaid Expenses

Prepaid expenses are amortized over the periods benefited.

i. Investasi pada Entitas Asosiasi

Entitas asosiasi adalah entitas yang mana Perusahaan dan Entitas Anak memiliki pengaruh signifikan dan bukan merupakan entitas anak maupun bagian partisipasi dalam ventura bersama. Pemilikan, secara langsung maupun tidak langsung, 20% atau lebih hak suara *investee* dianggap pemilikan pengaruh signifikan, kecuali dapat dibuktikan dengan jelas hal yang sebaliknya.

Investasi pada entitas asosiasi dicatat dengan menggunakan metode ekuitas, dimana pada awalnya diakui sebesar biaya perolehan. Selanjutnya, bagian Perusahaan dan Entitas Anak atas laba rugi entitas asosiasi, setelah penyesuaian yang diperlukan terhadap dampak penyeragaman kebijakan akuntansi dan eliminasi laba atau rugi yang dihasilkan dari transaksi antara Perusahaan dan Entitas Anak dan entitas asosiasi, akan menambah atau mengurangi jumlah tercatat investasi tersebut dan diakui sebagai laba rugi Perusahaan dan Entitas Anak. Penerimaan distribusi dari entitas asosiasi mengurangi jumlah tercatat investasi. Penyesuaian terhadap jumlah tercatat tersebut juga diperlukan jika terdapat perubahan dalam proporsi bagian Perusahaan dan Entitas Anak atas entitas asosiasi yang timbul dari penghasilan komprehensif lain dari entitas asosiasi. Bagian Perusahaan dan Entitas Anak atas perubahan tersebut diakui dalam penghasilan komprehensif lain dari Perusahaan dan Entitas Anak.

Goodwill yang terkait dengan akuisisi entitas asosiasi termasuk dalam jumlah tercatat investasi. Jika terdapat goodwill negatif, maka jumlah tersebut diakui di dalam laba rugi. Goodwill tidak diamortisasi dan dilakukan uji penurunan nilai setiap tahun.

Apabila nilai tercatat investasi telah mencapai nilai nol, kerugian selanjutnya akan diakui hanya jika Perusahaan dan Entitas Anak mempunyai komitmen untuk menyediakan bantuan pendanaan atau menjamin kewajiban entitas asosiasi yang bersangkutan.

Jika investasi pada entitas asosiasi menjadi investasi pada ventura bersama atau sebaliknya, maka entitas melanjutkan penerapan metode ekuitas dan tidak mengukur kembali kepentingan yang tersisa.

Perubahan nilai investasi yang disebabkan oleh terjadinya perubahan nilai ekuitas di entitas asosiasi yang timbul dari transaksi modal di entitas asosiasi dengan pihak ketiga diakui sebagai penghasilan komprehensif lain dan akan diakui sebagai penghasilan atau beban pada saat pelepasan investasi yang bersangkutan.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

i. Investment in an Associate

An associate is an entity, over which the Company and Subsidiaries have significant influence but is neither a subsidiary nor an interest in a joint venture. Direct or indirect ownership of 20% or more of the voting power of an investee is presumed to be an ownership of significant influence, unless it can be clearly demonstrated that this is not the case.

Investment in an associate is accounted for using the equity method, under which it is initially recognized at cost. Subsequently, the Company and Subsidiaries' share of the profit or loss of the associate, after any adjustments necessary to give effect to uniform accounting policies and elimination of profits or losses resulting from transactions between the Company and Subsidiaries and the associate, increases or decreases their carrying amount and is recognized in the Company and Subsidiaries' profit or loss. Distributions received from the associate reduce the carrying amount of the investment. Adjustments to the carrying amount may also be necessary for changes in the Company and Subsidiaries' proportionate interest in the associate arising from changes in the associate's other comprehensive income. The Company and Subsidiaries' share of these changes is recognized in other comprehensive income of the Company and Subsidiaries.

Goodwill on acquisition of associate is included in the carrying amount of the investment. In the case of negative goodwill, such amount is recognized in profit or loss. Goodwill is no longer amortized but annually assessed for impairment.

Once an investment's carrying value has been reduced to zero, further losses are taken up only if the Company and Subsidiaries have committed to provide financial support to, or have guaranteed the obligations of the associate.

If an investment in an associate becomes an investment in a joint venture or vice versa, the entity continues to apply the equity method and does not remeasure the retained interest.

Changes in value of the investments due to changes of equity in associate arising from capital transactions of such associate with other parties are recognized as other comprehensive income and recognized as income or expenses in the period in which disposal of the investments occurs.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

i. Fixed Assets

The Company and Subsidiaries have chosen the cost model as the accounting policy for their fixed assets measurement, except land rights.

Fixed assets, other than land rights, are stated at cost less accumulated depreciation. Depreciation is calculated on a straight-line basis over the useful lives of the assets. Estimated useful lives of the assets are as follows:

Tahun/Years

Prasarana	20	Land improvements
Bangunan	20	Buildings
Mesin	25	Machinery
Peralatan pengangkutan, perabot,		Transportation equipment, furniture,
peralatan kantor dan peralatan lain-lain	2 - 5	fixtures and other equipment

Masa manfaat aset tetap dan metode penyusutan ditelaah dan disesuaikan, jika sesuai keadaan, pada setiap akhir periode pelaporan.

Perusahaan dan Entitas Anak menganalisa fakta dan keadaan untuk masing-masing jenis hak atas tanah dalam bentuk Hak Guna Usaha (HGU), Hak Guna Bangunan (HGB) dan Hak Pakai (HP) dalam menentukan akuntansi untuk masing-masing hak tanah tersebut sehingga dapat merepresentasikan dengan tepat suatu kejadian atau transaksi ekonomik yang mendasarinya. Jika hak atas tanah tersebut tidak mengalihkan pengendalian atas aset pendasar kepada Perusahaan dan Entitas hak melainkan mengalihkan menggunakan aset pendasar, Perusahaan dan Entitas Anak menerapkan perlakuan akuntansi atas transaksi tersebut sebagai sewa berdasarkan PSAK No. 73. Jika hak atas tanah secara substansi menyerupai pembelian tanah, maka Perusahaan dan Entitas Anak menerapkan PSAK No. 16. Sementara, pengurusan atas perpanjangan pembaruan legal hak atas tanah dalam bentuk HGU, HGB dan HP diakui sebagai bagian dari akun "Beban Ditangguhkan" pada laporan posisi keuangan konsolidasian dan diamortisasi sepanjang mana yang lebih pendek antara umur hukum dan umur ekonomis tanah.

The fixed assets' useful lives and methods of depreciation are reviewed and adjusted, if appropriate, at each end of reporting period.

The Company and Subsidiaries analyze the facts and circumstances for each type of land rights in the form of Business Usage Rights ("Hak Guna Usaha" or HGU), Building Usage Right ("Hak Guna Bangunan" or HGB) and Usage Rights ("Hak Pakai" or HP) in determining the accounting for each of these land rights so that it can accurately represent an underlying economic event or transaction. If the land rights do not transfer control of the underlying assets to the Company and Subsidiaries, but gives the rights to use the underlying assets, the Company and Subsidiaries apply the accounting treatment of these transactions as leases under PSAK No. 73. If land rights substantially similar to land purchases, the Company and Subsidiaries apply PSAK No. 16. Meanwhile, the extension or the legal renewal costs of land rights in the form of HGU, HGB and HP are recognized as part of "Deferred Charges" account in the consolidated statements of financial position and are amortized over the shorter of the rights' legal life and land's economic life.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Aset dalam pembangunan dinyatakan sebesar biaya perolehan dan disajikan sebagai bagian dari "Aset Tetap" dalam laporan posisi keuangan konsolidasian. Akumulasi biaya perolehan akan dipindahkan ke masing-masing akun aset tetap yang bersangkutan pada saat aset tersebut selesai dikerjakan dan siap digunakan.

Beban perbaikan dan pemeliharaan dibebankan pada laba rugi pada saat terjadinya; biaya penggantian atau inspeksi yang signifikan dikapitalisasi pada saat terjadinya jika besar kemungkinan manfaat ekonomis di masa depan berkenaan dengan aset tersebut akan mengalir ke Perusahaan dan Entitas Anak, dan biaya perolehan aset dapat diukur secara andal. Aset tetap dihentikan pengakuannya pada saat dilepaskan atau ketika tidak ada manfaat ekonomis masa depan yang diharapkan dari penggunaan atau pelepasannya. Keuntungan atau kerugian yang timbul dari penghentian pengakuan aset dimasukkan dalam laba rugi pada periode aset tersebut dihentikan pengakuannya.

k. Sewa

Perusahaan dan Entitas Anak sebagai Penyewa

Pada tanggal permulaan kontrak, Perusahaan dan Entitas Anak menilai apakah kontrak merupakan, atau mengandung sewa. Suatu kontrak merupakan, atau mengandung sewa jika kontrak tersebut memberikan hak untuk mengendalikan penggunaan aset selama jangka waktu tertentu untuk dipertukarkan dengan imbalan.

Perusahaan dan Entitas Anak menyewa aset tetap tertentu dengan mengakui aset hak guna dan liabilitas sewa. Aset hak guna diakui sebesar biaya perolehan, dikurangi dengan akumulasi penyusutan dan penurunan nilai. Aset hak guna disusutkan selama jangka waktu yang lebih pendek antara umur manfaat aset hak guna atau masa sewa.

Liabilitas sewa diukur pada nilai kini pembayaran sewa yang belum dibayar. Setiap pembayaran sewa dialokasikan antara porsi pelunasan liabilitas dan biaya keuangan. Liabilitas sewa, disajikan sebagai liabilitas jangka panjang kecuali untuk bagian yang jatuh tempo dalam waktu dua belas (12) bulan atau kurang yang disajikan sebagai liabilitas jangka pendek. Unsur bunga dalam biaya keuangan dibebankan ke laba rugi selama masa sewa yang menghasilkan tingkat suku bunga konstan atas saldo liabilitas.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

Assets under construction are stated at cost and presented as part of "Fixed Assets" in the consolidated statements of financial position. The accumulated costs will be reclassified to the appropriate fixed assets account when construction is complete and the assets are ready for their intended use.

The cost of repairs and maintenance is charged to profit or loss as incurred; replacement or major inspection costs are capitalized when incurred if it is probable that future economic benefits associated with the item will flow to the Company and Subsidiaries, and the cost of the item can be reliably measured. An item of fixed assets is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset is included in profit or loss in the period in which the asset is derecognized.

k. Leases

The Company and Subsidiaries as a Lessee

At inception of a contract, the Company and Subsidiaries assess whether a contract is, or contains a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an asset for a period of time in exchange for a consideration.

The Company and Subsidiaries lease certain fixed assets by recognizing the right-of-use asset and lease liabilities. The right-of-use assets are stated at cost, less accumulated depreciation and impairment. Right-of-use assets are depreciated over the shorter of the useful life of the assets or the lease term.

Lease liabilities are measured at the present value of the lease payments that are not yet paid. Each lease payment is allocated between the liability portion and finance cost. Lease liabilities are classified in longterm liabilities, except for those with maturities of twelve (12) months or less which are included in current liabilities. The interest element of the finance cost is charged to profit or loss over the lease period so as to produce a constant rate of interest on the remaining balance of the liability.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Perusahaan dan Entitas Anak tidak mengakui aset hak guna dan liabilitas sewa untuk:

- sewa jangka-pendek yang memiliki masa sewa dua belas (12) bulan atau kurang; atau
- sewa yang asetnya bernilai rendah. Pembayaran yang dilakukan untuk sewa tersebut dibebankan ke laba rugi dengan dasar garis lurus selama masa sewa.

Perusahaan dan Entitas Anak sebagai Pesewa

Apabila Perusahaan dan Entitas Anak memiliki aset yang disewakan melalui sewa pembiayaan, nilai kini pembayaran sewa diakui sebagai piutang. Selisih antara nilai piutang bruto dan nilai kini piutang tersebut diakui sebagai penghasilan sewa pembiayaan tangguhan. Penghasilan sewa diakui selama masa sewa dengan menggunakan metode investasi neto yang mencerminkan suatu tingkat pengembalian periodik yang konstan.

Apabila aset disewakan melalui sewa operasi, aset disajikan di laporan posisi keuangan sesuai sifat aset tersebut. Penghasilan sewa diakui sebagai pendapatan dengan dasar garis lurus selama masa sewa.

I. Penurunan Nilai Aset Nonkeuangan

Pada setiap akhir periode pelaporan, Perusahaan dan Entitas Anak menilai apakah terdapat indikasi aset mengalami penurunan nilai. Jika terdapat indikasi tersebut, maka Perusahaan dan Entitas Anak mengestimasi jumlah terpulihkan aset tersebut. Jumlah terpulihkan suatu aset atau unit penghasil kas adalah jumlah yang lebih tinggi antara nilai wajar dikurangi biaya pelepasan dan nilai pakainya. Jika jumlah terpulihkan suatu aset lebih kecil dari jumlah tercatatnya, jumlah tercatat aset harus diturunkan menjadi sebesar jumlah terpulihkan. Kerugian penurunan nilai diakui segera dalam laba rugi.

Pembalikan rugi penurunan nilai untuk aset nonkeuangan selain goodwill, diakui jika, dan hanya jika, terdapat perubahan estimasi yang digunakan dalam menentukan jumlah terpulihkan aset sejak pengujian penurunan nilai terakhir kali. Pembalikan rugi penurunan nilai tersebut diakui segera dalam laba rugi, kecuali aset yang disajikan pada jumlah revaluasian sesuai dengan PSAK lain. Rugi penurunan nilai yang diakui atas goodwill tidak dibalik lagi.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

The Company and Subsidiaries do not recognize right-of-use assets and lease liabilities for:

- a. short-term leases that have a lease term of twelve (12) months or less; or
- lease with low-value assets. Payments made under those leases are charged to profit or loss on a straight line basis over the period of the lease.

The Company and Subsidiaries as a Lessor

When the Company and Subsidiaries have assets that are leased under finance leases, the present value of the lease payments is recognized as a receivable. The difference between the gross receivable and the present value of the receivable is recognized as unearned finance lease income. Lease income is recognized over the term of the lease using the net investment method, which reflects a constant periodic rate of return.

When assets are leased under an operating lease, the assets are presented in the statement of financial position based on the nature of the assets. Lease income is recognized over the term of the lease on a straight line basis.

I. Impairment of Non-financial Assets

The Company and Subsidiaries evaluate at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the Company and Subsidiaries estimate the recoverable amount of the asset. The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs of disposal and its value in use. Whenever the carrying amount of an asset exceeds its recoverable amount, the asset is considered to be impaired and is written down to its recoverable amount. The impairment loss is recognized immediately in profit or loss.

Reversal on impairment loss for non-financial assets other than goodwill is recognized if, and only if, there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment test is carried out. Reversal on impairment losses is immediately recognized in profit or loss, except for assets presented using the revaluation model in accordance with another PSAK. Impairment losses relating to goodwill are not reversed.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

m. Biaya Pinjaman

Biaya pinjaman, baik yang secara langsung maupun tidak langsung digunakan untuk mendanai suatu proses pembangunan aset tertentu yang memenuhi syarat ("aset kualifikasian"), dikapitalisasi hingga saat proses pembangunannya selesai. Untuk pinjaman yang secara khusus digunakan untuk perolehan aset kualifikasian, jumlah yang dikapitalisasi adalah sebesar biaya pinjaman yang terjadi selama periode berjalan, dikurangi dengan penghasilan investasi jangka pendek dari pinjaman tersebut.

Untuk pinjaman yang tidak secara khusus digunakan untuk perolehan aset kualifikasian, jumlah biaya pinjaman yang dikapitalisasi ditentukan dengan mengalikan tingkat kapitalisasi tertentu terhadap pengeluaran untuk aset kualifikasian tersebut.

n. Pengakuan Pendapatan dan Beban

Pengakuan pendapatan harus memenuhi lima (5) langkah sebagai berikut:

- a. Mengidentifikasi kontrak dengan pelanggan.
- b. Mengidentifikasi kewajiban pelaksanaan dalam kontrak
- c. Menetapkan harga transaksi.
- d. Mengalokasikan harga transaksi ke setiap kewajiban pelaksanaan.
- e. Mengakui pendapatan ketika kewajiban pelaksanaan telah dipenuhi dengan menyerahkan barang atau jasa yang dijanjikan ke pelanggan yaitu ketika pelanggan telah memiliki kendali atas barang atau jasa tersebut.

Model lima langkah untuk pengakuan pendapatan dari standar baru ini selaras dengan model dan praktik bisnis yang Perusahaan dan Entitas Anak lakukan. Sehingga, penerapan standar baru ini tidak berdampak terhadap laporan keuangan konsolidasian Perusahaan dan Entitas Anak.

Pendapatan dari penjualan barang diakui bila kewajiban pelaksanaan dipenuhi oleh Perusahaan dan Entitas Anak. Pendapatan diukur pada harga transaksi, yaitu jumlah imbalan yang diperkirakan menjadi hak Perusahaan dan Entitas Anak.

Penjualan lokal diakui pada saat hak kepemilikan beralih kepada pelanggan. Penjualan ekspor diakui pada saat barang dimuat di atas kapal pelabuhan pengirim (f.o.b. shipping point). Penjualan disajikan neto dari pajak pertambahan nilai, retur penjualan dan potongan harga.

Beban diakui pada saat terjadinya atau diamortisasi selama masa manfaatnya (accrual basis).

m. Borrowing Costs

Borrowing costs, either directly or indirectly used in financing the construction of a qualifying asset, are capitalized up to the date construction is complete. For borrowings that are specific to the acquisition of a qualifying asset, the amount to be capitalized is determined as the actual borrowing costs incurred during the period, less any income earned from the temporary investment of such borrowings.

For borrowings that are not specific to the acquisition of a qualifying asset, the amount to be capitalized is determined by applying a capitalization rate to the amount expensed on the qualifying asset.

n. Revenue and Expense Recognition

Revenue recognition has to fulfill five (5) steps as follows:

- a. Identify the contract with a customer.
- b. Identify the performance obligations in the contract.
- c. Determine the transaction price.
- d. Allocate the transaction price to each performance obligation.
- e. Recognize revenue when performance obligation is satisfied by transferring promised goods or services to a customer, when the customer obtains control of that goods or services.

The five-step model for revenue recognition of the new standard is aligned with the Company and Subsidiaries' current business model and practices. Thus, the adoption of this new standard had no impact on the Company and Subsidiaries' consolidated financial statements.

Revenue from sale of goods is recognized when the performance obligation is satisfied by the Company and Subsidiaries. Revenue is measured at the transaction price, which is the amount of consideration to which the Company and Subsidiaries is estimated to be entitled.

Local sales are recognized when title passes to the customer. Export sales are recognized upon loading of the goods for shipment to customers (f.o.b. shipping point). Sales are presented net of value-added tax, sales returns and price discounts.

Expenses are recognized when incurred or amortized according to their beneficial periods (accrual basis).

Imbalan Pascakerja

Perusahaan dan Entitas Anak menentukan liabilitas imbalan pascakerja sesuai dengan Undang-undang Ketenagakerjaan No. 13/2003 tanggal 25 Maret 2003 ("Undang-Undang"). PSAK No. 24 requires the present value of the defined benefit obligation, the related current service cost, and past service cost to be determined using the "Projected Unit Credit" method.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Ketika entitas memiliki surplus dalam program imbalan pasti, maka entitas mengukur aset imbalan pasti pada jumlah yang lebih rendah antara surplus program imbalan pasti dan batas atas aset yang ditentukan dengan menggunakan tingkat diskonto.

Entitas mengakui komponen biaya imbalan pasti, kecuali SAK mensyaratkan atau mengizinkan biaya tersebut sebagai biaya perolehan aset, sebagai berikut:

- (a) biaya jasa dalam laba rugi;
- (b) bunga neto atas liabilitas (aset) imbalan pasti neto dalam laba rugi; dan
- (c) pengukuran kembali liabilitas (aset) imbalan pasti neto dalam penghasilan komprehensif lain.

Pengukuran kembali atas liabilitas (aset) imbalan pasti neto yang diakui dalam penghasilan komprehensif lain tidak direklasifikasi ke laba rugi pada periode berikutnya. Akan tetapi, entitas dapat mengalihkan jumlah yang diakui sebagai penghasilan komprehensif lain tersebut pada pos lain dalam ekuitas.

Pengukuran kembali liabilitas (aset) imbalan pasti neto terdiri atas:

- (a) keuntungan dan kerugian aktuarial;
- (b) imbal hasil atas aset program, tidak termasuk jumlah yang dimasukkan dalam bunga neto atas liabilitas (aset) imbalan pasti neto; dan
- (c) setiap perubahan dampak batas atas aset, tidak termasuk jumlah yang dimasukkan dalam bunga neto atas liabilitas (aset) imbalan pasti neto.

Entitas mengakui biaya jasa lalu sebagai beban pada tanggal yang lebih awal antara ketika amandemen atau kurtailmen program terjadi dan ketika entitas mengakui biaya restrukturisasi terkait atau pesangon.

Perusahaan dan Entitas Anak mengakui keuntungan atau kerugian atas penyelesaian program imbalan pasti pada saat penyelesaian terjadi. Kurtailmen terjadi ketika entitas mengurangi secara signifikan jumlah pekerja yang ditanggung oleh program, atau mengubah ketentuan program imbalan pasti sehingga unsur yang signifikan dari jasa masa depan karyawan saat ini tidak lagi memenuhi syarat atas imbalan, atau akan memenuhi syarat hanya untuk imbalan yang dikurangi.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

When an entity has a surplus in a defined benefit plan, it measures the defined benefit asset at the lower amount between the surplus of defined benefit plan and the upper limit on assets determined using a discount rate.

An entity recognizes the components of defined benefit cost, except SAK requires or permits such costs as the acquisition cost of the assets, as follows:

- (a) service cost in profit or loss;
- (b) net interest on net liability (asset) of defined benefit in profit or loss; and
- (c) remeasurement on net liabilities (asset) of defined benefit in other comprehensive income.

Remeasurement on net liability (asset) of defined benefit recognized in other comprehensive income is not reclassified to profit or loss in subsequent periods. However, the entity may transfer the amounts recognized as other comprehensive income in another account in equity.

Remeasurement of net liability (asset) of defined benefit consists of:

- (a) actuarial gains and losses;
- (b) return on plan assets, excluding amounts included in net interest on the net defined benefit liability (asset); and
- (c) any change in the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability (asset).

The entity recognizes past service cost as an expense at the earlier of when the amendments or curtailment of program occurs and when the entity recognizes related restructuring costs or severances.

The Company and Subsidiaries recognize gains or losses on the settlement of a defined benefit plan when such occur. A curtailment occurs when an entity makes a material reduction in the number of employees covered by a plan, or amends the terms of a defined benefit plan so that a significant element of future service by current employees will no longer qualify for benefits, or will qualify only for reduced benefits.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Kurtailmen dapat terjadi karena suatu peristiwa yang berdiri sendiri, seperti penutupan pabrik, penghentian operasi, atau terminasi atau penghentian program. Sebelum menentukan biaya jasa lalu, atau keuntungan dan kerugian atas penyelesaian, Perusahaan dan Entitas Anak mengukur kembali liabilitas (aset) imbalan pasti neto menggunakan nilai wajar kini dari aset program dan asumsi aktuarial kini (termasuk suku bunga pasar dan harga pasar kini yang lain) yang mencerminkan imbalan yang ditawarkan dalam program sebelum amandemen, kurtailmen, atau penyelesaian program.

q. Perpajakan

1. Pajak Penghasilan

Beban pajak penghasilan kini ditetapkan berdasarkan taksiran laba kena pajak periode berjalan.

Pajak penghasilan dalam laba rugi periode berjalan terdiri dari pajak kini dan tangguhan. Pajak penghasilan diakui dalam laba rugi, kecuali untuk transaksi yang berhubungan dengan transaksi yang diakui langsung dalam ekuitas atau penghasilan komprehensif lain, dalam hal ini diakui dalam ekuitas atau penghasilan komprehensif lain.

Aset pajak kini dan liabilitas pajak kini dilakukan saling hapus jika, dan hanya jika, entitas memiliki hak yang dapat dipaksakan secara hukum untuk melakukan saling hapus jumlah yang diakui; dan memiliki intensi untuk menyelesaikan dengan dasar neto, atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan.

Aset dan liabilitas pajak tangguhan diakui atas perbedaan temporer antara aset dan liabilitas untuk tujuan komersial dan tujuan perpajakan setiap tanggal pelaporan. Aset pajak tangguhan diakui untuk seluruh perbedaan temporer yang boleh dikurangkan sepanjang besar kemungkinan perbedaan temporer yang boleh dikurangkan tersebut dapat dimanfaatkan untuk mengurangi laba kena pajak pada masa yang akan datang. Manfaat pajak di masa mendatang, seperti saldo rugi fiskal yang belum digunakan, diakui sejauh besar kemungkinan realisasi atas manfaat pajak tersebut.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

A curtailment may arise from an isolated event, such as the closing of a plant, discontinuance of an operation or termination or suspension of a plan. Before determining the past service cost, or gains and losses on the settlement, the Company and Subsidiaries shall remeasure the net liability (asset) of defined benefit using current fair value of plan assets and current actuarial assumptions (including current market interest rates and other current market prices) that reflects the rewards offered in the program prior to the amendment, curtailment or settlement program.

q. Taxation

1. Income Taxes

Current income tax expense is provided based on the estimated taxable profit for the period.

Income tax in profit or loss for the period comprises current and deferred tax. Income tax is recognized in profit or loss, except to the extent it relates to items recognized directly in equity or other comprehensive income in which case it is recognized in equity or other comprehensive income.

Current tax assets and current tax liabilities are offset if, and only if, the entity has a legally enforceable right to set off the recognized amounts; and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax assets and liabilities are recognized for temporary differences between the financial and tax bases of assets and liabilities at each reporting date. Deferred tax assets are recognized for all deductible temporary differences to the extent that it is probable that sufficient future taxable profit will be available against which the deductible temporary difference can be utilized. Future tax benefits, such as the carryforward of unused tax losses, are also recognized to the extent that realization of such benefits is probable.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Aset dan liabilitas pajak tangguhan diukur pada tarif pajak yang diharapkan akan digunakan pada periode ketika aset direalisasi atau ketika liabilitas dilunasi berdasarkan tarif pajak (dan peraturan perpajakan) yang berlaku atau secara substansial telah diberlakukan pada akhir periode pelaporan.

Aset pajak tangguhan dan liabilitas pajak tangguhan dilakukan saling hapus jika, dan hanya jika, entitas memiliki hak secara hukum untuk saling hapus aset pajak kini terhadap liabilitas pajak kini, dan aset pajak tangguhan dan liabilitas pajak tangguhan terkait dengan pajak penghasilan yang dikenakan oleh otoritas perpajakan atas entitas kena pajak yang sama atau entitas kena berbeda yang bermaksud memulihkan aset dan liabilitas pajak kini dengan dasar neto, atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan, pada setiap periode masa depan yang mana jumlah signifikan atas aset atau liabilitas pajak tangguhan diharapkan diselesaikan atau dipulihkan.

Perubahan terhadap kewajiban perpajakan diakui pada saat penetapan pajak diterima dan/atau, jika Perusahaan dan Entitas Anak mengajukan keberatan dan/atau banding, pada saat keputusan atas keberatan dan/atau banding telah ditetapkan.

2. Aset dan Liabilitas Pengampunan Pajak

Entitas Anak menerapkan PSAK No. 70, "Akuntansi Aset dan Liabilitas Pengampunan Pajak".

PSAK ini mengatur perlakuan akuntansi atas aset dan liabilitas pengampunan pajak sesuai dengan Undang-Undang No. 11/2016 tentang Pengampunan Pajak ("UU Pengampunan Pajak"), yang berlaku efektif tanggal 1 Juli 2016.

PSAK No. 70 memberikan pilihan kebijakan dalam pengakuan awal aset atau liabilitas yang timbul dari pelaksanaan UU Pengampunan Pajak, yaitu dengan mengikuti SAK yang relevan menurut sifat aset dan/atau liabilitas yang diakui (PSAK No. 70 Par. 06) atau mengikuti ketentuan yang diatur dalam PSAK No. 70 paragraf 10 hingga 23 (Pendekatan Opsional). Keputusan yang dibuat oleh entitas harus konsisten untuk semua aset dan liabilitas pengampunan pajak yang diakui.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset if, and only if, the entity has a legally enforceable right to set off current tax assets against current tax liabilities, and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity, or different taxable entities that intend either to settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Amendments to tax obligations are recorded when an assessment is received and/or, if objected to and/or appealed against by the Company and Subsidiaries, when the result of the objection and/or appeal is determined.

2. Assets and Liabilities under Tax Amnesty

The Subsidiaries applied PSAK No. 70, "Accounting for Tax Amnesty Assets and Liabilities".

This PSAK provides accounting treatment for assets and liabilities from Tax Amnesty in accordance with Law No. 11/2016 about Tax Amnesty ("Tax Amnesty Law"), which became on July 1, 2016.

PSAK No. 70 provides options in the initial recognition of the assets or liabilities arising from the implementation of the Tax Amnesty Law, whether to follow the relevant existing SAK according to the nature of the assets and/or liabilities recognized (PSAK No. 70 Par. 06) or to follow the provisions stated in PSAK No. 70 paragraphs 10 to 23 (Optional Approach). The decision made by the entity must be consistent for all recognized tax amnesty assets and/or liabilities.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Aset pengampunan pajak diakui sebesar biaya perolehan berdasarkan Surat Keterangan Pengampunan (SKPP). Liabilitas Pajak pengampunan pajak diakui sebesar kewajiban kontraktual untuk menyerahkan kas untuk menyelesaikan kewajiban berkaitan yang langsung dengan perolehan aset pengampunan pajak.

Entitas Anak mengakui selisih antara aset pengampunan pajak dan liabilitas pengampunan pajak sebagai bagian dari tambahan modal disetor di ekuitas. Selisih tersebut tidak dapat diakui sebagai laba atau rugi direalisasi maupun direklasifikasi ke saldo laba.

Entitas Anak telah memilih untuk mengukur kembali aset dan liabilitas pengampunan pajak sesuai dengan SAK pada tanggal SKPP. Selisih pengukuran kembali antara nilai wajar tersebut dengan biaya perolehan yang telah diakui sebelumnya, disesuaikan dalam saldo "Tambahan modal disetor".

Setelah Entitas Anak melakukan pengukuran kembali aset dan liabilitas pengampunan pajak sesuai SAK, Entitas Anak mereklasifikasi aset dan liabilitas pengampunan pajak tersebut ke dalam pos aset dan liabilitas serupa.

r. Pengukuran Nilai Wajar

Nilai wajar instrumen keuangan yang diperdagangkan di pasar aktif pada setiap tanggal pelaporan ditentukan dengan mengacu pada kuotasi harga pasar atau kuotasi harga pedagang efek (harga penawaran untuk posisi beli dan harga permintaan untuk posisi jual), tidak termasuk pengurangan apapun untuk biaya transaksi.

Untuk instrumen keuangan yang tidak memiliki pasar aktif, nilai wajar ditentukan dengan menggunakan teknik penilaian. Teknik penilaian mencakup penggunaan transaksi pasar terkini yang dilakukan secara wajar oleh pihak-pihak yang berkeinginan dan memahami (recent arm's length market transactions), penggunaan nilai wajar terkini instrumen lain yang secara substansial sama, analisa arus kas yang didiskonto, atau model penilaian lain.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

Tax amnesty assets are measured at acquisition cost based on Tax Amnesty Acknowledgement Letter (SKPP). Tax amnesty liabilities are measured at contractual obligation to deliver cash to settle the obligations directly related to the acquisition of tax amnesty assets.

The Subsidiaries shall recognize the difference between assets and liabilities of tax amnesty as part of additional paid-in capital in equity. This difference shall not be recycled to profit or loss or reclassified to retained earnings subsequently.

The Subsidiaries have opted to remeasure their tax amnesty assets and liabilities according to SAK on the date of the SKPP. The difference between the aforementioned fair values with the acquisition cost initially recognized is adjusted to "Additional paid-in capital".

After the Subsidiaries remeasure their tax amnesty assets and liabilities according to SAK, the Subsidiaries reclassify the tax amnesty assets and liabilities into similar line items of assets and liabilities.

r. Fair Value Measurement

The fair value of financial instruments that are traded on active markets is determined at each reporting date by reference to quoted market prices or dealer price quotations (bid price for long position and price demand for short position), excluding any deduction for transaction costs.

For financial instruments where there is no active market, fair value is determined using valuation techniques. Such techniques may include using recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis, or other valuation models.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

s. Laba per Saham

Laba per saham dasar dihitung dengan membagi laba neto yang dapat diatribusikan kepada pemilik entitas induk dengan total rata-rata tertimbang saham biasa yang beredar selama tahun yang bersangkutan.

t. Informasi Segmen

Entitas mengungkapkan informasi yang memungkinkan pengguna laporan keuangan untuk mengevaluasi sifat dan dampak keuangan dari aktivitas bisnis dan menggunakan "pendekatan manajemen" dalam menyajikan informasi segmen menggunakan dasar yang sama seperti halnya pelaporan internal. Segmen operasi dilaporkan dengan cara yang konsisten dengan pelaporan internal yang disampaikan kepada pengambil keputusan operasional. Dalam hal ini pengambil keputusan strategis adalah Direksi.

u. Provisi dan Kontinjensi

Provisi diakui jika, sebagai akibat peristiwa masa lalu, Perusahaan dan Entitas Anak memiliki kewajiban kini yang bersifat hukum maupun konstruktif yang dapat diestimasi secara andal, dan kemungkinan besar arus keluar sumber daya yang mengandung manfaat ekonomi diperlukan untuk menyelesaikan kewajiban tersebut. Provisi ditentukan dengan mendiskontokan perkiraan arus kas masa depan, dengan suatu tingkat diskonto sebelum pajak yang mencerminkan penilaian pasar atas nilai waktu dari uang dan risiko yang terkait dengan liabilitas yang bersangkutan.

Provisi ditelaah pada setiap akhir periode pelaporan dan disesuaikan untuk mencerminkan estimasi terbaik yang paling kini. Jika arus keluar sumber daya untuk menyelesaikan kewajiban kemungkinan besar tidak terjadi, maka provisi dibatalkan.

Aset dan liabilitas kontinjensi tidak diakui dalam laporan keuangan konsolidasian. Liabilitas kontinjensi diungkapkan dalam laporan keuangan konsolidasian, kecuali arus keluar sumber daya yang mengandung manfaat ekonomi kemungkinannya kecil. Aset kontinjensi diungkapkan dalam laporan keuangan konsolidasian, jika terdapat kemungkinan besar arus masuk manfaat ekonomis akan diperoleh.

s. Earnings per Share

Basic earnings per share are computed by dividing net income attributable to the owners of the parent by the weighted average number of issued and outstanding shares of stock during the year.

t. Segment Information

Entities disclose information that enable users of the financial statements to evaluate the nature and financial effects of the business activities and use "management approach" under which segment information is presented on the same basis as that used for internal reporting purposes. Operating segment is reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker has been identified as the board of directors that makes strategic decisions.

u. Provisions and Contingencies

Provision is recognized if, as a result of a past event, the Company and Subsidiaries have a present legal or constructive obligation that can be reliably estimated, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows, at a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provisions are reviewed at each end of reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

Contingent assets and liabilities are not recognized in the consolidated financial statements. Contingent liabilities are disclosed in the consolidated financial statements, unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are disclosed in the consolidated financial statements where an inflow of economic benefits is probable.

4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING

Penyusunan laporan keuangan konsolidasian, sesuai dengan Standar Akuntansi Keuangan di Indonesia, mewajibkan manajemen untuk membuat estimasi dan pertimbangan yang memengaruhi jumlah-jumlah yang dilaporkan dalam laporan keuangan. Sehubungan dengan adanya ketidakpastian yang melekat dalam membuat estimasi, hasil sebenarnya yang dilaporkan di masa mendatang dapat berbeda dengan jumlah estimasi yang dibuat.

Perusahaan dan Entitas Anak mendasarkan estimasi dan pertimbangannya pada parameter yang tersedia pada saat laporan keuangan konsolidasian disusun. Situasi mengenai perkembangan masa depan mungkin berubah akibat perubahan pasar atau situasi diluar kendali Perusahaan dan Entitas Anak. Perubahan tersebut dicerminkan dalam pertimbangan terkait pada saat terjadinya.

Estimasi dan pertimbangan berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Perusahaan dan Entitas Anak yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan konsolidasian:

Menentukan mata uang fungsional

Faktor-faktor yang dipertimbangkan dalam menentukan mata uang fungsional Perusahaan dan masing-masing Entitas Anak termasuk, antara lain, mata uang:

- yang paling memengaruhi harga jual barang dan jasa;
- dari negara yang kekuatan persaingan dan peraturannya sebagian besar menentukan harga jual barang dan jasa entitas;
- yang paling memengaruhi biaya tenaga kerja, bahan baku, dan biaya lain dari pengadaan barang atau jasa;
- yang mana dana dari aktivitas pendanaan dihasilkan; dan
- yang mana penerimaan dari aktivitas operasi pada umumnya ditahan.

Menentukan klasifikasi aset dan liabilitas keuangan

Perusahaan dan Entitas Anak menetapkan klasifikasi atas aset dan liabilitas tertentu sebagai aset keuangan dan liabilitas keuangan dengan mempertimbangkan apakah definisi yang ditetapkan PSAK No. 71 dipenuhi. Dengan demikian, aset keuangan dan liabilitas keuangan diakui sesuai dengan kebijakan akuntansi Perusahaan dan Entitas Anak seperti diungkapkan pada Catatan 3.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of consolidated financial statements, in conformity with Indonesian Financial Accounting Standards, requires management to make estimations and judgments that affect amounts reported therein. Due to the inherent uncertainty in making estimates, actual results reported in future periods may differ from those estimates.

The Company and Subsidiaries based their estimations and judgments on parameters available when the consolidated financial statements are prepared. Existing circumstances about future developments may change due to market changes or circumstances arising beyond the control of the Company and Subsidiaries. Such changes are reflected in the judgments as they occur.

The following estimations and judgments made by management in the process of applying the Company and Subsidiaries' accounting policies are those most likely to have significant effects on the amounts recognized in the consolidated financial statements:

Determining functional currency

The factors considered in determining the functional currency of the Company and each of its Subsidiaries include, among others, the currency:

- that mainly influences sales prices for goods and services;
- of the country whose competitive forces and regulations mainly determine the sales prices of its goods and services;
- that mainly influences labor, material and other costs of providing goods or services;
- in which funds from financing activities are generated; and
- in which receipts from operating activities are usually retained.

<u>Determining classification of financial assets and financial liabilities</u>

The Company and Subsidiaries determine the classification of certain assets and liabilities as financial assets and financial liabilities by judging if they meet the definition set forth in PSAK No. 71. Accordingly, the financial assets and financial liabilities are accounted for in accordance with the Company and Subsidiaries' accounting policies disclosed in Note 3.

4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Menentukan nilai wajar dan perhitungan amortisasi biaya perolehan dari instrumen keuangan

Perusahaan dan Entitas Anak mencatat aset dan liabilitas keuangan tertentu pada nilai wajar dan biaya perolehan diamortisasi, mengharuskan yang penggunaan estimasi akuntansi. Sementara komponen signifikan atas asumsi yang digunakan perhitungan amortisasi biaya perolehan ditentukan menggunakan bukti objektif yang dapat diverifikasi, jumlah nilai wajar atau amortisasi dapat berbeda bila Perusahaan dan Entitas Anak menggunakan metodologi penilaian atau asumsi yang berbeda. Perubahan tersebut dapat memengaruhi secara langsung laba rugi Perusahaan dan Entitas Anak. Penjelasan lebih rinci diungkapkan dalam Catatan 44.

Menentukan penyisihan kerugian kredit ekspektasian atas piutang usaha

Perusahaan dan Entitas Anak menggunakan matriks provisi untuk menghitung kerugian kredit ekspektasian untuk piutang usaha. Tingkat provisi didasarkan pada piutang yang telah jatuh tempo.

Matriks provisi pada awalnya didasarkan pada tingkat gagal bayar historis yang diobservasi oleh Perusahaan dan Entitas Anak. Perusahaan dan Entitas Anak menyesuaikan pengalaman kerugian kredit historis dengan informasi masa depan. Misalnya, jika perkiraan kondisi ekonomi diperkirakan akan memburuk selama setahun ke depan yang dapat menyebabkan peningkatan jumlah gagal bayar, Pada setiap tanggal pelaporan, tingkat gagal bayar historis yang diobservasi diperbarui dan perubahan perkiraan masa depan dianalisis oleh Perusahaan dan Entitas Anak.

Jumlah kerugian kredit ekspektasian sensitif terhadap perubahan keadaan dan perkiraan kondisi ekonomi. Pengalaman kerugian kredit historis Perusahaan dan Entitas Anak dan perkiraan kondisi ekonomi juga tidak dapat mewakili gagal bayar aktual pelanggan di masa depan. Penjelasan lebih rinci diungkapkan dalam Catatan 6.

Menilai penyisihan penurunan nilai pasar dan keusangan persediaan

Penyisihan penurunan nilai pasar dan keusangan persediaan diestimasi berdasarkan fakta dan situasi yang tersedia, termasuk namun tidak terbatas kepada, kondisi fisik persediaan yang dimiliki, harga jual pasar, estimasi biaya penyelesaian dan estimasi biaya yang timbul untuk penjualan. Penyisihan dievaluasi kembali dan disesuaikan jika terdapat tambahan informasi yang memengaruhi total yang diestimasi.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

<u>Determining fair value and calculation of cost</u> <u>amortization of financial instruments</u>

The Company and Subsidiaries record certain financial assets and liabilities at fair value and amortize costs, which requires the use of accounting estimates. While significant components of assumptions used in the calculation of cost amortization are determined using verifiable objective evidence, the fair value or amortization amount would differ if the Company and Subsidiaries utilize different valuation methodology or assumptions. Such changes would directly affect the Company and Subsidiaries' profit or loss. Further details are disclosed in Note 44.

<u>Determining provision for expected credit losses of trade</u> <u>receivables</u>

The Company and Subsidiaries use a provision matrix to calculate expected credit losses for trade receivables. The level of provision rates are based on accounts receivable that are past due.

The provision matrix is initially based on historical default rates observed by the Company and Subsidiaries. The Company and Subsidiaries adjust their historical credit losses experience with future information. For example, if the forecast for economic conditions is expected to deteriorate over the next year, which could lead to an increase in the amount of default, at each reporting date, the observed historical default rates are updated and changes in future forecasts are analyzed by the Company and Subsidiaries.

The amount of expected credit losses is sensitive to changes in circumstances and of forecast economic conditions. The Company and Subsidiaries historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future. Further details are disclosed in Note 6.

Assessing allowance for decline in market value and obsolescence of inventories

Allowance for impairment in market value and obsolescence of inventories is estimated based on available facts and circumstances, including but not limited to, the inventories own physical condition, their market selling prices, estimated costs of completion and estimated costs to be incurred for their sales. The provisions are re-evaluated and adjusted as additional information received affects the estimated amount.

4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Pada tanggal 31 Maret 2021, 31 Desember 2020 and 2019, Perusahaan dan Entitas Anak menilai bahwa tidak ada indikasi penurunan nilai pasar dan keusangan persediaan.

Menentukan metode penyusutan dan estimasi umur manfaat aset tetap

Biaya perolehan aset tetap disusutkan dengan menggunakan metode garis lurus berdasarkan estimasi masa manfaatnya. Manajemen mengestimasi masa manfaat aset tetap dua (2) tahun sampai dengan dua puluh lima (25) tahun. Ini adalah ekspektasi umur yang secara umum diterapkan dalam industri dimana Perusahaan dan Entitas Anak menjalankan bisnisnya. Perubahan tingkat pemakaian dan perkembangan teknologi dapat memengaruhi masa manfaat dan nilai sisa aset, dan karenanya biaya penyusutan masa depan mungkin direvisi. Penjelasan lebih rinci diungkapkan dalam Catatan 14.

Menilai penurunan nilai aset nonkeuangan tertentu

PSAK No. 48 mensyaratkan bahwa penilaian penurunan nilai dilakukan pada aset nonkeuangan tertentu apabila terdapat kejadian atau perubahan keadaan yang mengindikasikan bahwa jumlah tercatat tidak dapat diperoleh kembali. Faktor-faktor yang dianggap penting oleh Perusahaan dan Entitas Anak yang dapat memicu penelaahan atas penurunan nilai adalah sebagai berikut:

- (a) kinerja yang relatif kurang signifikan terhadap expected historical atau hasil operasional yang diharapkan dari proyek masa depan;
- (b) perubahan signifikan dalam cara penggunaan aset yang diperoleh atau strategi bisnis secara keseluruhan; dan
- (c) tren industri atau ekonomi yang negatif secara signifikan.

Kerugian akibat penurunan nilai diakui apabila jumlah tercatat aset nonkeuangan melebihi total yang dapat dipulihkan. Menentukan total yang dapat dipulihkan atas aset-aset tersebut membutuhkan estimasi atas arus kas yang diharapkan dapat dihasilkan dari penggunaan lanjutan dan disposisi akhir dari aset tersebut.

Pada tanggal 31 Maret 2021, 31 Desember 2020 dan 2019, Perusahaan dan Entitas Anak menilai bahwa tidak ada indikasi penurunan aset tetap dan aset tidak lancar lainnya.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

As of March 31, 2021, December 31, 2020 and 2019, the Company and Subsidiaries assessed that there was no indication of decline in market value and obsolescence of their inventories.

<u>Determining depreciation method and estimated useful</u> lives of fixed assets

The costs of fixed assets are depreciated on a straightline basis over their estimated useful lives. Management properly estimates the useful lives of these fixed assets to be within two (2) years up to twenty-five (25) years. These are common life expectancies applied in the industries in which the Company and Subsidiaries conduct their business. Changes in the expected level of usage and technological development could impact on the useful lives and the residual values of these assets, and therefore future depreciation charges could be revised. Further details are disclosed in Note 14.

Assessing impairment of certain non-financial assets

PSAK No. 48 requires that an impairment review be performed on certain non-financial assets whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. The factors the Company and Subsidiaries consider important that could trigger an impairment review include the following:

- (a) significant underperformance relative to the expected historical or project future operating results:
- significant changes in the manner of use of the acquired assets or the strategy for overall business; and
- (c) significant negative industry or economic trends.

An impairment loss is recognized whenever the carrying amount of a non-financial asset exceeds its recoverable amount. Determining the recoverable amount of such assets requires the estimation of cash flows expected to be generated from the continued use and ultimate disposition of such assets.

As of March 31, 2021, December 31, 2020 and 2019, the Company and Subsidiaries assessed that there was no indication of impairment of their fixed assets and other non-current assets.

4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Estimasi biaya dan liabilitas imbalan pascakerja

Penentuan liabilitas dan biaya imbalan pascakerja Perusahaan dan Entitas Anak bergantung pada pemilihan asumsi yang digunakan oleh aktuaris independen dalam menghitung jumlah-jumlah tersebut. Asumsi tersebut termasuk antara lain, tingkat diskonto, tingkat kenaikan gaji, tingkat pengunduran diri, tingkat cacat, usia pensiun dan tingkat mortalitas. Sementara Perusahaan dan Entitas Anak berkeyakinan bahwa asumsi tersebut adalah wajar dan sesuai, perbedaan signifikan pada hasil aktual atau perubahan signifikan dalam asumsi yang ditetapkan Perusahaan dan Entitas Anak dapat memengaruhi secara material liabilitas dan beban imbalan pascakerja. Penjelasan lebih rinci diungkapkan dalam Catatan 29.

Menentukan provisi atas pajak penghasilan

Pertimbangan signifikan dilakukan dalam menentukan provisi atas pajak penghasilan badan. Terdapat transaksi dan perhitungan tertentu yang penentuan pajak akhirnya adalah tidak pasti sepanjang kegiatan usaha normal. Perusahaan dan Entitas Anak mengakui liabilitas atas pajak penghasilan badan yang diharapkan berdasarkan estimasi apakah akan terdapat tambahan pajak penghasilan badan yang akan jatuh tempo.

Perusahaan dan Entitas Anak menelaah aset pajak tangguhan pada setiap tanggal pelaporan dan mengurangi jumlah tercatat sepanjang tidak ada kemungkinan bahwa laba kena pajak memadai untuk mengompensasi sebagian atau seluruh aset pajak tangguhan. Perusahaan dan Entitas Anak juga menelaah waktu yang diharapkan dan tarif pajak atas pemulihan perbedaan temporer dan menyesuaikan pengaruh atas pajak tangguhan yang sesuai. Penjelasan lebih rinci diungkapkan dalam Catatan 38.

Menentukan masa sewa kontrak dengan opsi perpanjangan dan penghentian serta tingkat diskonto ketika Perusahaan dan Entitas Anak sebagai penyewa

Perusahaan dan Entitas Anak menentukan masa sewa sebagai masa sewa yang tidak dapat dibatalkan, bersama dengan periode apa pun yang dicakup oleh opsi untuk memperpanjang sewa jika cukup pasti untuk dilaksanakan, atau periode apa pun yang dicakup oleh opsi untuk mengakhiri sewa, jika cukup pasti untuk tidak dilaksanakan.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

Estimate of post-employment benefits expense and liability

The determination of the Company and Subsidiaries' liability and expense for post-employment benefits is dependent on their selection of certain assumptions used in calculating such amounts. These assumptions include among others, discount rate, salary increment rate, turnover rates, disability rate, retirement age and mortality rate. While the Company and Subsidiaries believe that their assumptions are reasonable and appropriate, significant differences in the Company and Subsidiaries' actual results or significant changes in the Company and Subsidiaries' assumptions may materially affect their post-employment liability and expense. Further details are disclosed in Note 29.

Determining provision for income tax

Significant judgment is involved in determining provision for corporate income tax. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company and Subsidiaries recognize liabilities for expected corporate income tax based on estimates as to whether additional corporate income tax will be due.

The Company and Subsidiaries review their deferred tax assets at each reporting date and reduce the carrying amounts to the extent it is no longer probable that sufficient taxable profits will be available to allow all or part of the deferred tax asset to be utilized. The Company and Subsidiaries also review the expected timing and tax rates upon reversal of temporary differences and adjust the impact of deferred tax accordingly. Further details are disclosed in Note 38.

Determining the lease term of contracts with renewal and termination options, and discount rate when the Company and Subsidiaries is lessee

The Company and Subsidiaries determine the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Perusahaan dan Entitas Anak memiliki beberapa kontrak sewa yang mencakup opsi perpanjangan dan penghentian. Perusahaan dan Entitas Anak menerapkan pertimbangan dalam mengevaluasi apakah secara wajar cukup yakin bahwa opsi untuk memperpanjang atau mengakhiri sewa akan dilaksanakan.

Perusahaan dan Entitas Anak tidak dapat menentukan suku bunga implisit. Oleh karena itu, Perusahaan dan Entitas Anak menggunakan suku bunga pinjaman inkremental sebagai tingkat diskonto untuk menghitung nilai kini pembayaran sewa yang belum dibayar untuk mengakui liabilitas sewa. Dalam menentukan suku bunga pinjaman inkremental, Perusahaan dan Entitas Anak mempertimbangkan faktor-faktor utama antara lain: suku bunga pinjaman Perusahaan dan Entitas Anak, jangka waktu sewa, pembayaran sewa, dan mata uang dimana pembayaran sewa ditentukan. Penjelasan lebih rinci diungkapkan dalam Catatan 22.

Menilai pengendalian atau pengaruh signifikan pada entitas lain

Perusahaan menilai apakah pengaruh signifikan pada entitas lain melalui:

- adanya dewan perwakilan Perusahaan pada entitas lain dan pernyataan kontraktual.
- Perusahaan merupakan pemegang saham mayoritas dengan kepentingan ekuitas yang lebih besar dari pemegang saham lainnya.
- memiliki kekuatan untuk berpartisipasi dalam pengambilan keputusan keuangan dan operasi.

Penjelasan lebih rinci diungkapkan dalam Catatan 12.

Mengevaluasi provisi dan kontinjensi

Perusahaan dan Entitas Anak melakukan pertimbangan untuk membedakan antara provisi dan kontinjensi serta mempersiapkan provisi yang sesuai untuk proses hukum atau kewajiban konstruktif, jika ada, sesuai dengan kebijakan provisinya dan mempertimbangkan risiko dan ketidakpastian yang relevan.

Dalam situasi tertentu, Perusahaan dan Entitas Anak tidak dapat menentukan secara pasti jumlah liabilitas pajak mereka pada saat ini atau masa depan karena proses pemeriksaan, atau negosiasi dengan otoritas perpajakan. Ketidakpastian timbul terkait dengan interpretasi dari peraturan perpajakan yang kompleks serta jumlah dan waktu dari laba kena pajak di masa depan. Dalam menentukan jumlah yang harus diakui terkait dengan liabilitas pajak yang tidak pasti, Entitas Anak dan Perusahaan menerapkan pertimbangan yang sama yang akan mereka gunakan dalam menentukan jumlah cadangan yang harus diakui sesuai dengan PSAK No. 57, "Provisi, Liabilitas Kontinjensi, dan Aset Kontinjensi".

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

The Company and Subsidiaries have several lease contracts that include extension and termination options. The Company and Subsidiaries apply judgment in evaluating whether or not it is reasonably certain that the option to renew or terminate the lease will be exercised.

The Company and Subsidiaries are unable to determine the implicit rate. Therefore, the Company and Subsidiaries use the incremental borrowing rate as a discount rate to calculate the present value of the unpaid lease payments in order to recognize lease liabilities. In determining the incremental borrowing rate, the Company and Subsidiaries consider these main factors, among others: the Company and Subsidiaries' loan interest rates, lease term, lease payments and the currency in which the lease payments are determined. Further details are disclosed in Note 22.

Assessing control or significant influence on other entities

The Company has assessed its significant influence on other entities through:

- the presence of the board representative of the Company and the contractual term.
- the Company is the majority shareholder with greater interest than the other shareholders.
- has the power to participate in the financial and operating policy decisions.

Further details are disclosed in Note 12.

Evaluating provisions and contingencies

The Company and Subsidiaries exercise their judgment to distinguish between provisions and contingencies and set up appropriate provisions for their legal or constructive obligations, if any, in accordance with their policies on provisions and take the relevant risks and uncertainty into account.

In certain circumstances, the Company and Subsidiaries may not be able to determine the exact amount of their current or future tax liabilities due to ongoing investigations by, or negotiations with, the taxation authority. Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable profit. In determining the amount to be recognized in respect of an uncertain tax liability, the Company and Subsidiaries apply similar considerations as it would use in determining the amount of a provision to be recognized in accordance with PSAK No. 57, "Provisions, Contingent Liabilities and Contingent Assets."

Berdasarkan PSAK No. 68, "Pengukuran Nilai Wajar", terdapat tingkatan hirarki nilai wajar sebagai berikut:

- (a) harga kuotasian (tidak disesuaikan) dalam pasar aktif untuk aset atau liabilitas yang identik (Level 1),
- (b) input selain harga kuotasian yang termasuk dalam Level 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung (misalnya harga) atau secara tidak langsung (misalnya derivasi dari harga pasar) (Level 2), dan

Based on PSAK No. 68, "Fair Value Measurement," there are levels of fair value hierarchy as follows:

- (a) quoted prices (unadjusted) on active markets for identical assets or liabilities (Level 1),
- (b) inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from market prices) (Level 2), and

44. INSTRUMEN KEUANGAN (Lanjutan)

(c) input untuk aset atau liabilitas yang bukan berdasarkan data pasar yang dapat diobservasi (input yang tidak dapat diobservasi) (Level 3).

Nilai wajar untuk investasi jangka pendek berdasarkan kuotasi nilai pasar pada tanggal pelaporan yang termasuk dalam tingkat 1.

Metode dan asumsi berikut ini digunakan untuk mengestimasi nilai wajar untuk setiap kelompok instrumen keuangan sepanjang nilai tersebut dapat diestimasi:

Aset dan liabilitas keuangan jangka pendek:

 Instrumen keuangan jangka pendek dengan jatuh tempo satu tahun atau kurang (kas dan setara kas, piutang usaha, piutang lain-lain - pihak ketiga, aset lancar lainnya, pinjaman bank jangka pendek, pembiayaan Musyarakah jangka pendek, utang usaha, utang lain-lain, beban masih harus dibayar dan liabilitas jangka panjang yang akan jatuh tempo dalam waktu satu tahun).

Instrumen keuangan ini sangat mendekati jumlah tercatat mereka karena jatuh tempo mereka dalam jangka pendek.

Aset dan liabilitas keuangan jangka panjang:

 Liabilitas keuangan jangka panjang dengan suku bunga variabel (piutang pihak berelasi, liabilitas sewa, pinjaman bank jangka panjang dan utang Murabahah dan pembiayaan Musyarakah jangka panjang).

Nilai wajar dari liabilitas keuangan ini ditentukan dengan mendiskontokan arus kas masa datang menggunakan suku bunga yang berlaku dari transaksi pasar yang dapat diamati untuk instrumen dengan persyaratan, risiko kredit dan jatuh tempo yang sama (Level 2).

 Instrumen keuangan yang tidak dikuotasikan dalam pasar aktif (piutang pihak berelasi dan utang pihak berelasi).

Instrumen keuangan ini dicatat berdasarkan nilai nominal dikurangi penurunan nilai karena nilai wajarnya tidak dapat diukur secara andal. Adalah tidak praktis untuk memperkirakan nilai wajar dari instrumen keuangan dikarenakan tidak memiliki jangka waktu pembayaran yang tetap meskipun tidak diharapkan dapat diselesaikan dalam waktu dua belas (12) bulan setelah akhir periode pelaporan.

44. FINANCIAL INSTRUMENTS (Continued)

(c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

The fair value of the short-term investment is based on quoted market prices at the reporting date which is included in Level 1.

The following methods and assumptions are used to estimate the fair value of each class of financial instrument for which it is practicable to do so:

Short-term financial assets and liabilities:

 Short-term financial instruments with remaining maturities of one year or less (cash and cash equivalents, trade receivables, other receivables third parties, other current assets, short-term bank loans, short-term Musyarakah financing, trade payables, other payables, accrued expenses, and current maturities of long-term liabilities).

These financial instruments approximate to their carrying amounts largely due to their short-term maturities.

Long-term financial assets and liabilities:

 Long-term variable-rate financial liabilities (lease liabilities, long-term bank loans and long-term Murabahah payable and Musyarakah financing).

The fair value of these financial liabilities is determined by discounting future cash flows using applicable rates from observable current market transactions for instruments with similar terms, credit risk and remaining maturities (Level 2).

 Financial instruments not quoted on an active market (due from related parties and due to related parties).

These financial instruments are carried at their nominal amount less any impairment losses since their fair value cannot be reliably measured. It is not practical to estimate the fair value of these financial instruments because there are no fixed repayment terms although they are not expected to be settled within twelve (12) months after the end of the reporting period.

44. INSTRUMEN KEUANGAN (Lanjutan)

 Aset dan liabilitas keuangan jangka panjang lainnya (wesel bayar, pinjaman jangka panjang dan medium-term notes).

Estimasi nilai wajar didasarkan pada nilai diskonto dari arus kas masa datang yang disesuaikan untuk mencerminkan risiko pihak lawan (untuk aset keuangan) dan risiko kredit Perusahaan dan Entitas Anak (untuk liabilitas keuangan) dan menggunakan suku bunga pasar.

 Other long-term financial assets and liabilities (notes payable, long-term loans and medium-term notes).
