3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN

a. Dasar Penyusunan Laporan Keuangan Konsolidasian

Kebijakan akuntansi yang diterapkan dalam penyusunan laporan keuangan konsolidasian ini adalah selaras dengan kebijakan akuntansi yang diterapkan dalam penyusunan laporan keuangan konsolidasian untuk tahun yang berakhir pada tanggal 31 Desember 2017.

Laporan keuangan konsolidasian, kecuali laporan arus kas konsolidasian, telah disusun secara akrual dengan menggunakan konsep biaya perolehan (historical cost), kecuali untuk akun-akun tertentu yang diukur berdasarkan basis lain seperti yang dijelaskan dalam kebijakan akuntansi terkait.

Laporan arus kas konsolidasian disusun dengan menggunakan metode langsung, dan dikelompokkan ke dalam aktivitas operasi, investasi dan pendanaan.

Mata uang penyajian yang digunakan dalam penyusunan laporan keuangan konsolidasian adalah mata uang Dolar Amerika Serikat (USD), yang juga merupakan mata uang fungsional Perusahaan dan Entitas Anak.

b. Prinsip Konsolidasian

Entitas (entitas induk) yang mengendalikan satu atau lebih entitas lain (entitas anak) menyajikan laporan keuangan konsolidasian. Investor, terlepas dari sifat keterlibatannya dengan entitas (investee), menentukan apakah investor merupakan entitas induk dengan menilai apakah investor tersebut mengendalikan investee.

Investor mengendalikan *investee* ketika investor terekspos atau memiliki hak atas imbal hasil variabel dari keterlibatannya dengan *investee* dan memiliki kemampuan untuk memengaruhi imbal hasil tersebut melalui kekuasaannya atas *investee*. Dengan demikian, investor mengendalikan *investee* jika dan hanya jika investor memiliki seluruh hal berikut ini:

- (a) kekuasaan atas investee;
- (b) eksposur atau hak atas imbal hasil variabel dari keterlibatannya dengan *investee*; dan
- (c) kemampuan untuk menggunakan kekuasaannya atas *investee* untuk memengaruhi jumlah imbal hasil investor.

Investor menilai kembali apakah investor mengendalikan *investee* jika fakta dan keadaan mengindikasikan adanya perubahan terhadap satu atau lebih dari tiga (3) elemen pengendalian.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED

a. Basis of Preparation of the Consolidated Financial Statements

The accounting policies applied in the preparation of these consolidated financial statements are consistent with those used for the preparation of the consolidated financial statements for the year ended December 31, 2017.

The consolidated financial statements, except for the consolidated statements of cash flows, have been prepared on an accrual basis of accounting using the historical cost concept, except for certain accounts that are measured on the other bases described in the related accounting policies.

The consolidated statements of cash flows are prepared using the direct method, and classified into operating, investing and financing activities.

The presentation currency used in the preparation of the consolidated financial statements is United States Dollar (USD), which is also the functional currency of the Company and Subsidiaries.

b. Principles of Consolidation

An entity (the parent) that controls one or more other entities (subsidiaries) presents consolidated financial statements. Investors, apart from the nature of their involvement with an entity (investee), determine whether the investors are a parent by assessing whether the investor controls the investee.

An investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Therefore, the investor controls the investee if and only if the investor has all of the following:

- (a) power over the investee;
- (b) exposure or rights to variable returns from its involvement with the investee; and
- (c) the ability to use its power over the investee to affect the amount of the investor's returns.

Investors reassess whether the investors control the investee if facts and circumstances indicate that one or more of the three (3) control elements have changed.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Konsolidasi atas *investee* dimulai sejak tanggal investor memperoleh pengendalian atas *investee* dan berakhir ketika investor kehilangan pengendalian atas *investee*.

Entitas induk menentukan apakah entitas induk adalah entitas investasi. Entitas investasi adalah entitas yang:

- (a) memperoleh dana dari satu atau lebih investor dengan tujuan memberikan investor tersebut jasa manajemen investasi;
- (b) menyatakan komitmen kepada investor bahwa tujuan bisnisnya adalah untuk menginvestasikan dana yang semata-mata untuk memperoleh imbal hasil dari kenaikan nilai modal, penghasilan investasi, atau keduanya; dan
- (c) mengukur dan mengevaluasi kinerja dari seluruh investasinya berdasarkan nilai wajar.

Entitas induk yang adalah entitas investasi mengukur investasi dalam entitas anak pada nilai wajar melalui laba rugi.

Kepentingan nonpengendali mencerminkan bagian atas laba rugi dan aset neto yang tidak diatribusikan kepada entitas induk dan disajikan secara terpisah dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian dan ekuitas pada laporan posisi keuangan konsolidasian, dipisahkan dari ekuitas yang dapat diatribusikan kepada entitas induk.

Seluruh penghasilan komprehensif diatribusikan pada pemilik entitas induk dan pada kepentingan nonpengendali bahkan jika hal ini mengakibatkan kepentingan nonpengendali mempunyai saldo defisit.

Seluruh saldo akun dan transaksi yang material antar entitas yang dikonsolidasi telah dieliminasi.

Jika entitas induk kehilangan pengendalian pada entitas anak, maka entitas induk:

- a. menghentikan pengakuan aset (termasuk setiap goodwill) dan liabilitas entitas anak terdahulu dari laporan posisi keuangan konsilidasian.
- b. mengakui sisa investasi pada entitas anak terdahulu pada nilai wajarnya pada tanggal hilangnya pengendalian, dan selanjutnya mencatat sisa investasi tersebut dan setiap jumlah terutang oleh atau kepada entitas anak terdahulu. Nilai wajar tersebut dianggap sebagai nilai wajar pada saat pengakuan awal aset keuangan atau (jika sesuai) biaya perolehan pada saat pengakuan awal investasi pada entitas asosiasi atau ventura bersama.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

Investee is consolidated from the date on which the investor obtains control of investee and continues to be consolidated until the date that such control ceases.

A parent determines whether the parent entity is an investment entity. An investment entity is an entity that:

- (a) obtains funds from one or more investors for the purpose of providing investment management services;
- (b) its business purpose is to invest funds solely for returns from capital appreciation, investment income, or both; and
- (c) measures and evaluates the performance of its investments on a fair value basis.

A parent that is an investment entity measures its investments in particular subsidiaries at fair value through profit or loss.

Non-controlling interest represents a portion of the profit or loss and net assets not attributable to the parent and is presented separately in the consolidated statements of profit or loss and other comprehensive income, and within equity in the consolidated statements of financial position, separately from equity attributable to the parent.

Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

All significant intercompany transactions and balances have been eliminated.

If a parent loses control of a subsidiary, the parent:

- a. derecognizes the assets (including goodwill) and liabilities of the former subsidiary from the consolidated statements of financial position.
- b. recognizes any investment retained in the former subsidiary at its fair value at the date when control is lost, and subsequently accounts for it and for any amounts owed by or to the former subsidiary. That fair value shall be regarded as the fair value on initial recognition of a financial asset or, when appropriate, the cost on initial recognition of an investment in an associate or joint venture.

Financial assets are classified as financial assets at fair value through profit or loss (FVTPL), held-to-maturity investments (HTM), loans and receivables or available-for-sale financial assets (AFS). The Company and Subsidiaries determine the classification of their financial assets at initial recognition and, where allowed and appropriate, re-evaluate the designation of such assets at each end of reporting period.

As of June 30, 2018 and December 31, 2017, the Company and Subsidiaries' financial assets consist of financial assets at FVTPL and loans and receivables.

Subsequent Measurement

 Financial assets at fair value through profit or loss (FVTPL)

Financial assets are classified as at FVTPL where the financial assets are either held for trading or are designated as FVTPL at initial recognition. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivative assets are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets at FVTPL are carried on the consolidated statements of financial position at fair value with gains or losses recognized in profit or loss include any dividend or interest earned from the financial assets.

• Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted on an active market. Such financial assets are carried at amortized cost using the effective interest method, less any impairment. Gains and losses are recognized in profit or loss when the loans and receivables are derecognized or impaired, as well as through the amortization process.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Penurunan Nilai Aset Keuangan

Pada setiap tanggal pelaporan, Perusahaan dan Entitas Anak mengevaluasi apakah aset keuangannya mengalami penurunan nilai. Jika terdapat bukti objektif penurunan nilai, maka jumlah kerugian tersebut, yang diukur sebagai selisih antara jumlah tercatat aset dengan nilai kini estimasi arus kas masa datang (tidak termasuk kerugian kredit di masa datang yang belum terjadi) yang didiskonto menggunakan suku bunga efektif yang dihitung saat pengakuan awal aset tersebut, diakui pada laba rugi.

Penghentian Pengakuan Aset Keuangan

Perusahaan dan Entitas Anak menghentikan pengakuan aset keuangan jika, dan hanya jika, hak kontraktual atas arus kas yang berasal dari aset keuangan tersebut berakhir, atau mengalihkan hak kontraktual untuk menerima arus kas yang berasal dan dari aset keuangan, atau tetap memiliki hak kontraktual untuk menerima arus kas yang berasal dari aset keuangan tetapi juga menanggung kewajiban kontraktual untuk membayar arus kas yang diterima tersebut kepada satu atau lebih pihak penerima melalui suatu kesepakatan yang memenuhi persyaratan tertentu. Ketika Perusahaan dan Entitas Anak mentransfer aset keuangan, maka Perusahaan dan Entitas Anak mengevaluasi sejauh mana Perusahaan dan Entitas Anak tetap memiliki risiko dan manfaat atas kepemilikan aset keuangan tersebut.

2. Liabilitas Keuangan dan Instrumen Ekuitas

Pengakuan Awal

Perusahaan dan Entitas Anak menetapkan klasifikasi liabilitas keuangannya pada saat pengakuan awal. Instrumen utang dan ekuitas dikelompokkan sebagai liabilitas keuangan atau sebagai ekuitas sesuai dengan substansi pengaturan kontraktual.

Liabilitas keuangan diklasifikasikan sebagai liabilitas keuangan yang diukur pada nilai wajar melalui laporan laba rugi atau liabilitas keuangan yang diukur pada biaya perolehan diamortisasi. Liabilitas keuangan diakui pada awalnya sebesar nilai wajar dan, dalam hal pinjaman dan utang, termasuk biaya transaksi yang dapat diatribusikan secara langsung.

Impairment of Financial Assets

The Company and Subsidiaries evaluate at each reporting date whether any of their financial assets are impaired. If there is objective evidence of impairment, the amount of loss, which is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not been incurred) discounted at the effective interest rate computed at initial recognition of the asset, is recognized in profit or loss.

Derecognition of Financial Assets

The Company and Subsidiaries derecognize financial assets if, and only if, the contractual rights to the cash flows from the financial asset expire, or the contractual rights to receive the cash flows of the financial asset are transferred, or the contractual rights to receive the cash flows of the financial asset are retained but assume a contractual obligation to pay those cash flows to one or more recipients in an arrangement that meets certain conditions. When the Company and Subsidiaries evaluate the extent to which Company and Subsidiaries retain the risks and rewards of ownership of the financial asset.

2. Financial Liabilities and Equity Instruments

Initial Recognition

The Company and Subsidiaries determine the classification of their financial liabilities at initial recognition. Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

Financial liabilities are classified as financial liabilities at fair value through profit or loss or financial liabilities measured at amortized cost. Financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, inclusive of directly attributable transaction costs.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Instrumen ekuitas adalah setiap kontrak yang memberikan hak residual atas aset suatu entitas setelah dikurangi seluruh liabilitasnya. Instrumen ekuitas yang diterbitkan oleh Perusahaan dan Entitas Anak dicatat sebesar hasil yang diperoleh, dikurangi biaya penerbitan instrumen ekuitas.

Instrumen keuangan majemuk, seperti obligasi atau instrumen sejenis yang dapat dikonversi oleh pemegangnya menjadi saham biasa dengan total yang telah ditetapkan, dipisahkan antara liabilitas keuangan dan ekuitas sesuai dengan substansi pengaturan kontraktual. Pada tanggal penerbitan instrumen keuangan majemuk, nilai wajar dari komponen liabilitas diestimasi dengan menggunakan suku bunga yang berlaku di pasar untuk instrumen non-convertible yang serupa. Total ini dicatat sebagai liabilitas dengan dasar biaya perolehan diamortisasi menggunakan metode suku bunga efektif sampai dengan liabilitas tersebut berakhir melalui konversi atau pada tanggal instrumen jatuh tempo. Komponen ekuitas ditentukan dengan cara mengurangkan total komponen liabilitas dari keseluruhan nilai wajar instrumen keuangan majemuk. Total tersebut diakui dan dicatat dalam ekuitas, dikurangi dengan pajak penghasilan, dan tidak ada pengukuran setelah pengakuan awal.

Pada tanggal 30 Juni 2018 dan 31 Desember 2017, liabilitas keuangan Perusahaan dan Entitas Anak terdiri dari liabilitas keuangan yang diukur pada biaya perolehan diamortisasi (Catatan 42).

Pengukuran Selanjutnya

Setelah pengakuan awal, liabilitas keuangan dalam kategori ini selanjutnya diukur pada biaya perolehan diamortisasi dengan menggunakan metode suku bunga efektif. Keuntungan atau kerugian diakui dalam laba rugi ketika liabilitas keuangan tersebut dihentikan pengakuannya atau mengalami penurunan nilai, dan melalui proses amortisasi.

Penghentian Pengakuan Liabilitas Keuangan

Perusahaan dan Entitas Anak menghentikan pengakuan liabilitas keuangan jika, dan hanya jika, kewajiban Perusahaan dan Entitas Anak dilepaskan, dibatalkan atau kedaluwarsa. PT INDAH KIAT PULP & PAPER Tbk

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company and Subsidiaries are recorded at the proceeds received, net of direct issuance costs.

Compound financial instruments, a bond or similar instrument convertible by the holder into a fixed number of ordinary shares, are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangement. At the date of issuance of compound financial instruments, the fair value of the liability component is estimated using the prevailing market interest rate for a similar nonconvertible instrument. This amount is recorded as a liability on an amortized cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date. The equity component is determined by deducting the amount of the liability component from the fair value of the compound financial instruments as a whole. This amount is recognized and included in equity, net of income tax effects, and is not subsequently remeasured.

As of June 30, 2018 and December 31, 2017, the Company and Subsidiaries' financial liabilities consist of liabilities at amortized cost (Note 42).

Subsequent Measurement

After initial recognition, financial liabilities in this category are subsequently measured at amortized cost using the effective interest method. Gains or losses are recognized in profit or loss when the financial liabilities are derecognized or impaired, as well as through the amortization process.

Derecognition of Financial Liabilities

The Company and Subsidiaries derecognize financial liabilities if, and only if, the Company and Subsidiaries' obligations are discharged, cancelled or expire.

3. Saling Hapus Instrumen Keuangan

Aset keuangan dan liabilitas keuangan saling hapus dan jumlah netonya dilaporkan dalam laporan posisi keuangan konsolidasian jika, dan hanya jika, saat ini memiliki hak yang berkekuatan hukum untuk melakukan saling hapus atas total yang telah diakui dan terdapat niat untuk menyelesaikannya secara neto, atau untuk merealisasikan aset dan menyelesaikan liabilitasnya secara simultan.

4. Instrumen Keuangan yang Diukur pada Biaya Perolehan Diamortisasi

Biaya perolehan diamortisasi dihitung menggunakan metode suku bunga efektif dikurangi dengan penyisihan atas penurunan nilai dan pembayaran pokok atau nilai yang tidak dapat ditagih. Perhitungan tersebut mempertimbangkan premium atau diskonto pada saat perolehan dan termasuk biaya transaksi dan biaya yang merupakan bagian yang tidak terpisahkan dari suku bunga efektif.

Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi arus kas masa datang selama perkiraan umur dari instrumen keuangan, atau jika lebih tepat, digunakan periode yang lebih singkat, untuk jumlah tercatat neto instrumen keuangan. Total bunga berdasarkan penerapan metode suku bunga efektif diakui sebagai penghasilan atau beban bunga.

g. Persediaan

Persediaan dinyatakan sebesar nilai yang lebih rendah antara biaya perolehan atau nilai realisasi neto (the lower of cost or net realizable value). Biaya perolehan ditentukan dengan metode rata-rata tertimbang (weighted-average method). Biaya barang jadi yang diproduksi dan barang dalam proses termasuk alokasi sistematis overhead produksi. Penyisihan persediaan usang ditentukan berdasarkan hasil penelaahan atas keadaan persediaan pada tiap akhir periode pelaporan.

h. Biaya Dibayar Dimuka

Biaya dibayar dimuka diamortisasi selama masa manfaat masing-masing biaya.

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statements of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

4. Financial Instruments Measured at Amortized Cost

Amortized cost is computed using the effective interest rate method less any allowance for impairment and principal repayment or reduction. The calculation takes into account any premium or discount on acquisition and includes transaction costs and fees that are an integral part of the effective interest rate.

The effective interest rate is the rate that exactly discounts estimated future cash flows through the expected life of the financial instrument or when appropriate, a shorter period, to the net carrying amount of the financial instrument. The interest amount based on the application of the effective interest method is recognized as interest income or expense.

g. Inventories

Inventories are valued at the lower of cost or net realizable value. Cost is determined using the weighted-average method. Cost of finished goods produced and work in process includes a systematic allocation of production overheads. Allowance for inventory obsolescence is provided based on a review of the condition of inventories at the end of each reporting period.

h. Prepaid Expenses

Prepaid expenses are amortized over the periods benefited.

i. Investasi pada Entitas Asosiasi

Entitas asosiasi adalah entitas yang mana Perusahaan dan Entitas Anak memiliki pengaruh signifikan dan bukan merupakan entitas anak (Catatan 3b) maupun bagian partisipasi dalam ventura bersama. Pemilikan, secara langsung maupun tidak langsung, 20% atau lebih hak suara investee dianggap pemilikan pengaruh signifikan, kecuali dapat dibuktikan dengan jelas hal yang sebaliknya.

Investasi pada entitas asosiasi dicatat dengan menggunakan metode ekuitas, dimana pada awalnya diakui sebesar biaya perolehan. Selanjutnya, bagian Perusahaan dan Entitas Anak atas laba rugi entitas asosiasi, setelah penyesuaian yang diperlukan terhadap dampak penyeragaman kebijakan akuntansi dan eliminasi laba atau rugi yang dihasilkan dari transaksi antara Perusahaan dan Entitas Anak dan entitas asosiasi, akan menambah atau mengurangi jumlah tercatat investasi tersebut dan diakui sebagai laba rugi Perusahaan dan Entitas Anak. Penerimaan distribusi dari entitas asosiasi mengurangi jumlah tercatat investasi. Penyesuaian terhadap jumlah tercatat tersebut juga diperlukan jika terdapat perubahan dalam proporsi bagian Perusahaan dan Entitas Anak atas entitas asosiasi yang timbul dari penghasilan komprehensif lain dari entitas asosiasi. Bagian Perusahaan dan Entitas Anak atas perubahan tersebut diakui dalam penghasilan komprehensif lain dari Perusahaan dan Entitas Anak.

Goodwill yang terkait dengan akuisisi entitas asosiasi termasuk dalam jumlah tercatat investasi. Jika terdapat goodwill negatif, maka jumlah tersebut diakui di dalam laba rugi. Goodwill tidak diamortisasi dan dilakukan uji penurunan nilai setiap tahun.

Apabila nilai tercatat investasi telah mencapai nilai nol, kerugian selanjutnya akan diakui bila Perusahaan dan Entitas Anak mempunyai komitmen untuk menyediakan bantuan pendanaan atau menjamin kewajiban entitas asosiasi yang bersangkutan.

Jika investasi pada entitas asosiasi menjadi investasi pada ventura bersama atau sebaliknya, maka entitas melanjutkan penerapan metode ekuitas dan tidak mengukur kembali kepentingan yang tersisa.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

i. Investment in an Associate

An associate is an entity, over which the Company and Subsidiaries have significant influence and that is neither a subsidiary (Note 3b) nor an interest in a joint venture. Direct or indirect ownership of 20% or more of the voting power of an investee is presumed to be an ownership of significant influence, unless it can be clearly demonstrated that this is not the case.

Investment in an associate is accounted for using the equity method, under which it is initially recognized at cost. Subsequently, the Company and Subsidiaries' share of the profit or loss of the associate, after any adjustments necessary to give effect to uniform accounting policies and elimination of profits or losses resulting from transactions between the Company and Subsidiaries and the associate, increases or decreases their carrying amount and is recognized in the Company and Subsidiaries' profit or loss. Distributions received from the associate reduce the carrying amount of the investment. Adjustments to the carrying amount may also be necessary for changes in the Company and Subsidiaries' proportionate interest in the associate arising from changes in the associate's other comprehensive income. The Company and Subsidiaries' share of these changes is recognized in other comprehensive income of the Company and Subsidiaries.

Goodwill on acquisition of associate is included in the carrying amount of the investment. In the case of negative goodwill, such amount is recognized in profit or loss. Goodwill is no longer amortized but annually assessed for impairment.

Once an investment's carrying value has been reduced to zero, further losses are taken up only if the Company and Subsidiaries have committed to provide financial support to, or have guaranteed the obligations of the associate.

If an investment in an associate becomes an investment in a joint venture or vice versa, the entity continues to apply the equity method and does not remeasure the retained interest.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Perubahan nilai investasi yang disebabkan oleh terjadinya perubahan nilai ekuitas di entitas asosiasi yang timbul dari transaksi modal di entitas asosiasi dengan pihak ketiga diakui sebagai penghasilan komprehensif lain dan akan diakui sebagai penghasilan atau beban pada saat pelepasan investasi yang bersangkutan.

j. Aset Tetap

Perusahaan dan Entitas Anak telah memilih untuk menggunakan model biaya sebagai kebijakan akuntansi pengukuran aset tetapnya, kecuali hak atas tanah.

Aset tetap, selain hak atas tanah, dinyatakan sebesar harga perolehan dikurangi akumulasi penyusutan. Penyusutan dihitung dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomis aset tetap sebagai berikut:

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

Changes in value of the investments due to changes of equity in associate arising from capital transactions of such associate with other parties are recognized as other comprehensive income and recognized as income or expenses in the period in which disposal of the investments occurs.

j. Fixed Assets

The Company and Subsidiaries have chosen the cost model as the accounting policy for their fixed assets measurement, except land rights.

Fixed assets, other than land rights, are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of fixed assets as follows:

Tahun/*Years*

Prasarana	12 - 20	Land improvements
Bangunan	11 - 20	Buildings
Mesin	25	Machinery
Peralatan pengangkutan, perabot,		Transportation equipment, furniture,
peralatan kantor dan peralatan lain-lain	2 - 5	fixtures and other equipment

Pada setiap akhir periode pelaporan, nilai residu, umur manfaat dan metode penyusutan ditelaah kembali, dan jika perlu disesuaikan.

ISAK No. 25, "Hak Atas Tanah", menetapkan bahwa biaya pengurusan legal hak atas tanah dalam bentuk Hak Guna Usaha ("HGU"), Hak Guna Bangunan ("HGB") dan Hak Pakai ("HP") ketika tanah diperoleh pertama kali diakui sebagai bagian dari biaya perolehan tanah pada akun "Aset Tetap" dan tidak diamortisasi. Sementara biaya pengurusan atas perpanjangan atau pembaruan legal hak atas tanah dalam bentuk HGU, HGB dan HP diakui sebagai bagian dari akun "Beban Ditangguhkan - Neto" pada laporan posisi keuangan konsolidasian dan diamortisasi sepanjang mana yang lebih pendek antara umur hukum dan umur ekonomis tanah.

Aset dalam pengerjaan dinyatakan sebesar biaya perolehan dan disajikan sebagai bagian dari "Aset Tetap" dalam laporan posisi keuangan konsolidasian. Akumulasi biaya perolehan akan dipindahkan ke masing-masing akun aset tetap yang bersangkutan pada saat aset tersebut selesai dikerjakan dan siap digunakan.

At each end of reporting period, the assets' residual value, useful lives and method of depreciation are reviewed, and adjusted if appropriate.

ISAK No. 25, "Land Rights", pescribes that the legal cost of land right in the form of Business Usage Rights ("Hak Guna Usaha" or "HGU"), Building Usage Right (Hak Guna Bangunan or "HGB") and Usage Rights ("Hak Pakai" or "HP") when the land was initially acquired are recognized as part of the cost of the land under the "Fixed Assets" account and not amortized. Meanwhile the extension or the legal renewal costs of land rights in the form of HGU, HGB and HP are recognized as part of "Deferred Charges - Net" account in the consolidated statements of financial position and are amortized over the shorter of the rights' legal life and the land's economic life.

Assets under construction are stated at cost and presented as part of "Fixed Assets" in the consolidated statements of financial position. The accumulated costs will be reclassified to the appropriate fixed assets account when construction is complete and the assets are ready for their intended use.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Beban perbaikan dan pemeliharaan dibebankan pada laba rugi pada saat terjadinya; biaya penggantian atau inspeksi yang signifikan dikapitalisasi pada saat terjadinya jika besar kemungkinan manfaat ekonomis di masa depan berkenaan dengan aset tersebut akan mengalir ke Perusahaan dan Entitas Anak, dan biaya perolehan aset dapat diukur secara andal. Aset tetap dihentikan pengakuannya pada saat dilepaskan atau ketika tidak ada manfaat ekonomis masa depan yang diharapkan dari penggunaan atau pelepasannya. Keuntungan atau kerugian yang timbul dari penghentian pengakuan aset dimasukkan dalam laba rugi pada periode aset tersebut dihentikan pengakuannya.

k. Sewa

Sewa yang mengalihkan secara substansial semua risiko dan manfaat yang terkait dengan kepemilikan aset kepada *lessee* diklasifikasikan sebagai sewa pembiayaan. Pada awal masa sewa, sewa pembiayaan dikapitalisasi sebesar nilai wajar aset sewaan atau sebesar nilai kini dari pembayaran sewa minimum, jika nilai kini lebih rendah dari nilai wajar.

Pembayaran sewa minimum dipisahkan antara bagian yang merupakan beban keuangan dan bagian yang merupakan pelunasan liabilitas sehingga menghasilkan suatu tingkat bunga periodik yang konstan atas saldo liabilitas. Beban keuangan dibebankan pada laba rugi. Aset sewaan yang dimiliki oleh *lessee* dengan dasar sewa pembiayaan dicatat pada akun aset tetap dan disusutkan sepanjang masa manfaat dari aset sewaan tersebut atau periode masa sewa, mana yang lebih pendek, jika tidak ada kepastian yang memadai bahwa *lessee* akan mendapatkan hak kepemilikan pada akhir masa sewa.

Sewa yang tidak mengalihkan secara substansial seluruh risiko dan manfaat yang terkait dengan kepemilikan aset diklasifikasikan sebagai sewa operasi.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

The cost of repairs and maintenance is charged to profit or loss as incurred; replacement or major inspection costs are capitalized when incurred if it is probable that future economic benefits associated with the item will flow to the Company and Subsidiaries, and the cost of the item can be reliably measured. An item of fixed assets is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset is included in profit or loss in the period the asset is derecognized.

k. Leases

Leases that transfer substantially all the risks and benefits incidental to ownership of the leased item to the lessee are classified as finance leases. Finance leases are capitalized at the inception of the lease at the fair value of the leased assets or at the present value of the minimum lease payments if the present value is lower than the fair value.

Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recorded in profit or loss. Leased assets held by the lessee under finance leases are included in fixed assets and depreciated over the estimated useful life of the assets or the lease term, whichever is shorter, if there is no reasonable certainty that lessee will obtain ownership by the end of the lease term.

Leases that do not transfer substantially all the risks and benefits incidental to ownership of the leased item are classified as operating leases.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

I. Penurunan Nilai Aset Nonkeuangan

Pada setiap akhir periode pelaporan, Perusahaan dan Entitas Anak menilai apakah terdapat indikasi aset mengalami penurunan nilai. Jika terdapat indikasi tersebut, maka Perusahaan dan Entitas Anak mengestimasi jumlah terpulihkan aset tersebut. Jumlah terpulihkan suatu aset atau unit penghasil kas adalah jumlah yang lebih tinggi antara nilai wajar dikurangi biaya pelepasan dan nilai pakainya. Jika jumlah terpulihkan suatu aset lebih kecil dari jumlah tercatatnya, jumlah tercatat aset harus diturunkan menjadi sebesar jumlah terpulihkan. Kerugian penurunan nilai diakui segera dalam laba rugi.

Pembalikan rugi penurunan nilai untuk aset nonkeuangan selain goodwill, diakui jika, dan hanya jika, terdapat perubahan estimasi yang digunakan dalam menentukan jumlah terpulihkan aset sejak pengujian penurunan nilai terakhir kali. Pembalikan rugi penurunan nilai tersebut diakui segera dalam laba rugi, kecuali aset yang disajikan pada jumlah revaluasian sesuai dengan PSAK lain. Rugi penurunan nilai yang diakui atas goodwill tidak dibalik lagi.

m. Biaya Pinjaman

Biaya pinjaman, baik yang secara langsung maupun tidak langsung digunakan untuk mendanai suatu proses pembangunan aset tertentu yang memenuhi syarat ("aset kualifikasian"), dikapitalisasi hingga saat proses pembangunannya selesai. Untuk pinjaman yang secara khusus digunakan untuk perolehan aset kualifikasian, jumlah yang dikapitalisasi adalah sebesar biaya pinjaman yang terjadi selama periode berjalan, dikurangi dengan penghasilan investasi jangka pendek dari pinjaman tersebut.

Untuk pinjaman yang tidak secara khusus digunakan untuk perolehan aset kualifikasian, jumlah biaya pinjaman yang dikapitalisasi ditentukan dengan mengalikan tingkat kapitalisasi tertentu terhadap pengeluaran untuk aset kualifikasian tersebut.

n. Pengakuan Pendapatan dan Beban

Pendapatan diakui bila besar kemungkinan manfaat ekonomi akan diperoleh oleh Perusahaan dan Entitas Anak dan jumlahnya dapat diukur secara handal. Pendapatan diukur pada nilai wajar imbalan yang diterima, tidak termasuk diskon, rabat dan pajak penjualan (PPN).

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

I. Impairment of Non-financial Assets

The Company and Subsidiaries evaluate at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the Company and Subsidiaries estimate the recoverable amount of the asset. The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs of disposal and its value in use. Whenever the carrying amount of an asset exceeds its recoverable amount, the asset is considered to be impaired and is written down to its recoverable amount. The impairment loss is recognized immediately in profit or loss.

Reversal on impairment loss for non-financial assets other than goodwill is recognized if, and only if, there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment test was carried out. Reversal on impairment losses is immediately recognized in profit or loss, except for assets presented using the revaluation model in accordance with another PSAK. Impairment losses relating to goodwill are not reversed.

m. Borrowing Costs

Borrowing costs, either directly or indirectly used in financing the construction of a qualifying asset, are capitalized up to the date when construction is complete. For borrowings that are specific to the acquisition of a qualifying asset, the amount to be capitalized is determined as the actual borrowing costs incurred during the period, less any income earned from the temporary investment of such borrowings.

For borrowings that are not specific to the acquisition of a qualifying asset, the amount to be capitalized is determined by applying a capitalization rate to the amount expensed on the qualifying asset.

n. Revenue and Expense Recognition

Revenue is recognized to the extent it is probable that the economic benefits will flow to the Company and Subsidiaries and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received, excluding discounts, rebates and sales taxes (VAT).

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Penjualan lokal diakui pada saat hak kepemilikan beralih kepada pelanggan. Penjualan ekspor diakui pada saat barang dimuat di atas kapal pelabuhan pengirim (f.o.b. shipping point). Penjualan disajikan neto dari pajak pertambahan nilai, retur penjualan dan potongan harga.

Beban diakui pada saat terjadinya atau diamortisasi selama masa manfaatnya (accrual basis).

o. Transaksi dan Saldo dalam Mata Uang Asing

Transaksi dalam mata uang selain USD dijabarkan ke USD berdasarkan kurs yang berlaku pada tanggal transaksi. Pada akhir periode pelaporan, seluruh aset dan liabilitas moneter dalam mata uang selain USD dijabarkan ke USD dengan menggunakan kurs tengah yang ditetapkan oleh Bank Indonesia pada tanggal tersebut. Keuntungan atau kerugian yang timbul dari penyesuaian kurs maupun penyelesaian aset dan liabilitas moneter dalam mata uang asing tersebut dikreditkan atau dibebankan sebagai laba rugi periode berjalan.

Kurs penutup yang digunakan pada tanggal 30 Juni 2018 dan 31 Desember 2017 adalah sebagai berikut (dalam angka penuh):

o. Foreign Currency Transactions and Balances

Transactions in currencies other than USD are translated into USD at the rate prevailing at the transaction date. At the end of reporting period, all monetary assets and liabilities in currencies other than the USD are translated into USD at the middle exchange rates quoted by Bank Indonesia on that date. Gains or losses resulting from such adjustment or settlement of each monetary asset and liability denominated in foreign currencies are credited or charged as current period profit or loss.

p. Employee Benefits

Effective January 1, 2017, the Company and Subsidiaries applied PSAK No. 24 (Improvement 2016), "Employee Benefits," which clarifies that the market depth of high-quality corporate bonds is assessed based on the currency in which the obligation is denominated and not on the basis of the country where the obligation is located.

The adoption of this improvement had no impact on the Company and Subsidiaries' consolidated financial statements.

Perusahaan dan Entitas Anak menentukan liabilitas imbalan pascakerja sesuai dengan Undang-undang Ketenagakerjaan No. 13/2003 tanggal 25 Maret 2003 ("Undang-Undang"). PSAK No. 24 mensyaratkan entitas menggunakan metode "Projected Unit Credit" untuk menentukan nilai kini kewajiban imbalan pasti, biaya jasa kini terkait, dan biaya jasa lalu.

Ketika entitas memiliki surplus dalam program imbalan pasti, maka entitas mengukur aset imbalan pasti pada jumlah yang lebih rendah antara surplus program imbalan pasti dan batas atas aset yang ditentukan dengan menggunakan tingkat diskonto.

Entitas mengakui komponen biaya imbalan pasti, kecuali SAK mensyaratkan atau mengizinkan biaya tersebut sebagai biaya perolehan aset, sebagai berikut:

- (a) biaya jasa dalam laba rugi;
- (b) bunga neto atas liabilitas (aset) imbalan pasti neto dalam laba rugi; dan
- (c) pengukuran kembali liabilitas (aset) imbalan pasti neto dalam penghasilan komprehensif

Pengukuran kembali atas liabilitas (aset) imbalan pasti neto yang diakui dalam penghasilan komprehensif lain tidak direklasifikasi ke laba rugi pada periode berikutnya. Akan tetapi, entitas dapat mengalihkan jumlah yang diakui sebagai penghasilan komprehensif lain tersebut pada pos lain dalam ekuitas.

Pengukuran kembali liabilitas (aset) imbalan pasti neto terdiri atas:

- (a) keuntungan dan kerugian aktuarial;
- (b) imbal hasil atas aset program, tidak termasuk jumlah yang dimasukkan dalam bunga neto atas liabilitas (aset) imbalan pasti neto; dan
- (c) setiap perubahan dampak batas atas aset, tidak termasuk jumlah yang dimasukkan dalam bunga neto atas liabilitas (aset) imbalan pasti neto.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

Short-term Employee Benefits

Short-term employee benefits represent compensation provided by the Company and Subsidiaries such as salaries, allowance, bonus and pension contribution paid which are recognized when they accrue to the employees.

Post-employment Benefits

The Company and Subsidiaries determine their postemployment benefits liability under Labor Law No. 13/2003 dated March 25, 2003 (the "Law"). PSAK No. 24 requires the present value of the defined benefit obligation, the related current service cost, and past service cost to be determined using the "Projected Unit Credit" method.

When an entity has a surplus in a defined benefit plan, an entity measures the defined benefit asset at the lower amount between the surplus of defined benefit plan and the upper limit on assets that determined using a discount rate.

An entity recognizes the components of defined benefit cost, except SAK require or permit such costs as the acquisition cost of the asset, as follows:

- (a) service cost in profit or loss:
- (b) net interest on net liability (asset) of defined benefit in profit or loss; and
- (c) remeasurement on net liability (asset) of defined benefit in other comprehensive income.

Remeasurement on net liability (asset) of defined benefit recognized in other comprehensive income is not reclassified to profit or loss in subsequent periods. However, the entity may transfer the amounts recognized as other comprehensive income in another account in equity.

Remeasurement on net liability (asset) of defined benefit consists of:

- (a) actuarial gains and losses;
- (b) return on plan assets, excluding amounts included in net interest on the net defined benefit liability (asset); and
- (c) any change in the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability (asset).

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Entitas mengakui biaya jasa lalu sebagai beban pada tanggal yang lebih awal antara ketika amandemen atau kurtailmen program terjadi dan ketika entitas mengakui biaya restrukturisasi terkait atau pesangon.

Perusahaan dan Entitas Anak mengakui keuntungan atau kerugian atas penyelesaian program imbalan pasti pada saat penyelesaian terjadi. Kurtailmen terjadi ketika entitas mengurangi secara signifikan jumlah pekerja yang ditanggung oleh program; atau mengubah ketentuan program imbalan pasti sehingga unsur yang signifikan dari jasa masa depan karyawan saat ini tidak lagi memenuhi syarat atas imbalan, atau akan memenuhi syarat hanya untuk imbalan yang dikurangi. Kurtailmen dapat terjadi karena suatu peristiwa yang berdiri sendiri, seperti penutupan pabrik, penghentian operasi, atau terminasi atau penghentian program.

Kurtailmen dapat terjadi karena suatu peristiwa yang berdiri sendiri, seperti penutupan pabrik, penghentian operasi, atau terminasi atau penghentian program. Sebelum menentukan biaya jasa lalu, atau keuntungan dan kerugian atas penyelesaian, Perusahaan dan Entitas Anak mengukur kembali liabilitas (aset) imbalan pasti neto menggunakan nilai wajar kini dari aset program dan asumsi aktuarial kini (termasuk suku bunga pasar dan harga pasar kini yang lain) yang mencerminkan imbalan yang ditawarkan dalam program sebelum amandemen, kurtailmen, atau penyelesaian program.

q. Perpajakan

1. Pajak Penghasilan

Beban pajak penghasilan kini ditetapkan berdasarkan taksiran laba kena pajak periode berjalan.

Pajak penghasilan dalam laba rugi periode berjalan terdiri dari pajak kini dan tangguhan. Pajak penghasilan diakui dalam laba rugi, kecuali untuk transaksi yang berhubungan dengan transaksi yang diakui langsung dalam ekuitas atau penghasilan komprehensif lain, dalam hal ini diakui dalam ekuitas atau penghasilan komprehensif lain.

Aset pajak kini dan liabilitas pajak kini dilakukan saling hapus jika, dan hanya jika, entitas memiliki hak yang dapat dipaksakan secara hukum untuk melakukan saling hapus jumlah yang diakui; dan memiliki intensi untuk menyelesaikan dengan dasar neto, atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

The entity recognizes past service cost as an expense at the earlier of when the amendments or curtailment of program occurs and when the entity recognizes related restructuring costs or severances.

The Company and Subsidiaries recognize gains or losses on the settlement of defined benefit plan when it occurs. A curtailment occurs when an entity make a material reduction in the number of employees covered by a plan; or amends the terms of a defined benefit plan so that a significant element of future service by current employees will no longer qualify for benefits, or will qualify only for reduced benefits.

A curtailment may arise from an isolated event, such as the closing of a plant, discontinuance of an operation or termination or suspension of a plan. Before determining the past service cost, or gains and losses on the settlement, the Company and Subsidiaries shall remeasure the net liability (asset) of defined benefit using current fair value of plan assets and current actuarial assumptions (including current market interest rates and other current market prices) that reflect the rewards offered in the program prior to amendment, curtailment or settlement program.

q. Taxation

1. Income Taxes

Current income tax expense is provided based on the estimated taxable income for the period.

Income tax in profit or loss for the period comprises current and deferred tax. Income tax is recognized in profit or loss, except to the extent it relates to items recognized directly in equity or other comprehensive income in which case it is recognized in equity or other comprehensive income.

Current tax assets and current tax liabilities are offset if, and only if, the entity has a legally enforceable right to set off the recognized amounts; and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Aset dan liabilitas pajak tangguhan diakui atas perbedaan temporer antara aset dan liabilitas untuk tujuan komersial dan untuk tujuan perpajakan setiap tanggal pelaporan. Aset pajak tangguhan diakui untuk seluruh perbedaan temporer yang boleh dikurangkan, sepanjang besar kemungkinan perbedaan temporer yang boleh dikurangkan tersebut dapat dimanfaatkan untuk mengurangi laba fiskal pada masa yang akan datang. Liabilitas pajak tangguhan diakui atas semua perbedaan temporer kena pajak. Manfaat pajak di masa mendatang, seperti saldo rugi fiskal yang belum digunakan, diakui sejauh besar kemungkinan realisasi atas manfaat pajak tersebut.

Aset dan liabilitas pajak tangguhan diukur pada tarif pajak yang diharapkan akan digunakan pada periode ketika aset direalisasi atau ketika liabilitas dilunasi berdasarkan tarif pajak (dan peraturan perpajakan) yang berlaku atau secara substansial telah diberlakukan pada akhir periode pelaporan.

Aset pajak tangguhan dan liabilitas pajak tangguhan dilakukan saling hapus jika, dan hanya jika, entitas memiliki hak secara hukum untuk saling hapus aset pajak kini terhadap liabilitas pajak kini, dan aset pajak tangguhan dan liabilitas pajak tangguhan terkait dengan pajak penghasilan yang dikenakan oleh otoritas perpajakan atas entitas kena pajak yang sama atau entitas kena pajak berbeda yang bermaksud untuk memulihkan aset dan liabilitas pajak kini dengan dasar neto, atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan, pada setiap periode masa depan yang mana jumlah signifikan atas aset atau liabilitas pajak tangguhan diharapkan diselesaikan atau dipulihkan.

Perubahan terhadap kewajiban perpajakan diakui pada saat penetapan pajak diterima dan/atau, jika Perusahaan dan Entitas Anak mengajukan keberatan dan/atau banding, pada saat keputusan atas keberatan dan/atau banding telah ditetapkan.

3. SIGNIFICANT ACCOUNTING POLICIES APPLIED (Continued)

Deferred tax assets and liabilities are recognized for temporary differences between the financial and tax bases of assets and liabilities at each reporting date. Deferred tax assets are recognized for all deductible temporary differences to the extent it is probable that future taxable profit will be available against which the deductible temporary difference can be utilized. Deferred tax liabilities are recognized for all taxable temporary differences. Future tax benefits, such as the carry-forward of unused tax losses, are also recognized to the extent that realization of such benefits is probable.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset if, and only if, the entity has a legally enforceable right to set off current tax assets against current tax liabilities, and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity, or different taxable entities that intend either to settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Amendments to tax obligations are recorded when an assessment is received and/or, if objected to and/or appealed against by the Company and Subsidiaries, when the result of the objection and/or appeal is determined.

2. Aset dan Liabilitas Pengampunan Pajak

Entitas Anak menerapkan PSAK No. 70, "Akuntansi Aset dan Liabilitas Pengampunan Pajak", secara prospektif. Standar ini mengatur perlakuan akuntansi atas aset dan liabilitas pengampunan pajak sesuai dengan Undang-Undang No. 11 Tahun 2016 tentang Pengampunan Pajak (UU Pengampunan Pajak). Pernyataan ini berlaku efektif sejak tanggal pengesahan UU Pengampunan Pajak.

Entitas Anak telah memilih pendekatan opsional terkait dengan pengukuran, penyajian dan pengungkapan aset dan liabilitas Pengampunan Pajak.

Pengukuran saat Pengakuan Awal

Aset Pengampunan Pajak diukur sebesar biaya vana timbul perolehan atas aset dari Pengampunan Pajak berdasarkan Surat Keterangan Pengampunan Pajak ("Surat Keterangan"). Liabilitas Pengampunan Paiak diukur sebesar kewajiban kontraktual untuk menyerahkan kas atau setara kas untuk menyelesaikan kewajiban yang berkaitan langsung dengan perolehan aset Pengampunan Pajak.

Entitas Anak mengakui selisih antara aset Pengampunan Pajak dan liabilitas Pengampunan Pajak di ekuitas dalam pos "Tambahan Modal Disetor". Jumlah tersebut tidak dapat diakui sebagai laba rugi direalisasi maupun direklasifikasi ke saldo laba. Uang tebusan yang dibayarkan diakui dalam laba rugi pada periode Surat Keterangan disampaikan.

Pengukuran setelah Pengakuan Awal

Setelah pengakuan awal, Entitas Anak mengukur aset dan liabilitas Pengampunan Pajaknya mengacu pada SAK yang relevan. Selanjutnya, entitas diperkenankan, namun tidak disyaratkan untuk mengukur kembali aset dan liabilitas Pengampunan Pajak berdasarkan nilai wajar sesuai dengan SAK yang relevan pada tanggal Surat Keterangan.

Selisih pengukuran kembali antara nilai wajar pada tanggal Surat Keterangan dengan biaya perolehan aset dan liabilitas pengampunan pajak yang telah diakui sebelumnya disesuaikan dalam saldo tambahan modal disetor.

2. Assets and Liabilities under Tax Amnesty

The Subsidiaries applied PSAK No. 70, "Accounting for Assets and Liabilities Under Tax Amnesty," prospectively. This standard regulates the accounting treatment of the Tax Amnesty assets and liabilities in accordance with Law No. 11 Year 2016 on Tax Amnesty (Tax Amnesty Law). This statement became effective from the date of enactment of the Tax Amnesty Law.

The Subsidiaries has chosen the optional approach in relation to the measurement, presentation and disclosure of Tax Amnesty assets and liabilities.

Measurement at Initial Recognition

The Tax Amnesty assets are measured at cost of the assets arising from Tax Amnesty in accordance with the Tax Amnesty Certificate (the "Certificate"). The Tax Amnesty liabilities are measured at the contractual obligation to deliver cash or cash equivalents to settle the obligations relating directly to the acquisition of the Tax Amnesty assets.

Subsidiaries recognize the difference between the Tax Amnesty assets and Tax Amnesty liabilities in equity under "Additional Paid-in Capital" account. Such amount cannot be recognized as the realized profit or loss nor reclassified to retained earnings. The payment of redemption money is recognized in profit or loss in the period the Certificate is delivered.

Measurement after Initial Recognition

After initial recognition, the Subsidiaries measure their Tax Amnesty assets and liabilities in reference to the relevant SAK. Furthermore, an entity is allowed, but not required, to remeasure the assets and liabilities under Tax Amnesty at fair value in accordance with the relevant SAK at the date of the Certificate.

The difference resulting from remeasurement between the fair value on the date of the Certificate and the costs of the assets and liabilities under Tax Amnesty recognized previously is adjusted in the balance of additional paid-in capital.

3. KEBIJAKAN AKUNTANSI SIGNIFIKAN YANG DITERAPKAN (Lanjutan)

Penghentian Pengakuan

Aset dan liabilitas pengampunan pajak dihentikan pengakuannya sesuai dengan ketentuan SAK untuk masing-masing jenis aset dan liabilitas tersebut.

Entitas Anak mereklasifikasi aset dan liabilitas pengampunan pajak ke dalam pos aset dan liabilitas serupa, ketika:

- (a) entitas mengukur kembali aset dan liabilitas pengampunan pajak; atau
- (b) entitas memperoleh pengendalian atas *investee*.

Entitas Anak menyajikan kembali laporan keuangan terdekat sebelumnya, hanya jika tanggal laporan keuangan tersebut adalah setelah tanggal Surat Keterangan.

Entitas Anak tidak melakukan saling hapus aset dan liabilitas Pengampunan Pajak.

r. Pengukuran Nilai Wajar

Nilai wajar instrumen keuangan yang diperdagangkan di pasar aktif pada setiap tanggal pelaporan ditentukan dengan mengacu pada kuotasi harga pasar atau kuotasi harga pedagang efek (harga penawaran untuk posisi beli dan harga permintaan untuk posisi jual), tidak termasuk pengurangan apapun untuk biaya transaksi.

Untuk instrumen keuangan yang tidak memiliki pasar aktif, nilai wajar ditentukan dengan menggunakan teknik penilaian. Teknik penilaian mencakup penggunaan transaksi pasar terkini yang dilakukan secara wajar oleh pihak-pihak yang berkeinginan dan memahami (recent arm's length market transactions), penggunaan nilai wajar terkini instrumen lain yang secara substansial sama, analisa arus kas yang didiskonto, atau model penilaian lain.

s. Laba per Saham

Laba per saham dasar dihitung dengan membagi laba neto yang dapat diatribusikan kepada pemilik entitas induk dengan total rata-rata tertimbang saham biasa yang beredar selama tahun yang bersangkutan.

Derecognition

Assets and liabilities under Tax Amnesty are derecognized in accordance with the provisions of SAK for each type of asset and liability.

Subsidiaries reclassify the assets and liabilities under Tax Amnesty to the item of similar assets and liabilities, when:

- (a) the entity remeasures the assets and liabilities under Tax Amnesty; or
- (b) the entity obtains control over the investee.

Subsidiaries restate its previous closest financial statements, only if the date of such financial statements is after the date of the Certificate.

Subsidiaries do not offset Tax Amnesty assets and liabilities against each other.

r. Fair Value Measurement

The fair value of financial instruments that are traded on active markets is determined at each reporting date by reference to quoted market prices or dealer price quotations (bid price for long position and price demand for short position), excluding any deduction for transaction costs.

For financial instruments where there is no active market, fair value is determined using valuation techniques. Such techniques may include using recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis, or other valuation models.

s. Earnings per Share

Basic earnings per share are computed by dividing net income attributable to the owners of the parent by the weighted average number of issued and outstanding shares of stock during the year.

t. Informasi Segmen

Entitas mengungkapkan informasi yang memungkinkan pengguna laporan keuangan untuk mengevaluasi sifat dan dampak keuangan dari aktivitas bisnis dan menggunakan "pendekatan manajemen" dalam menyajikan informasi segmen menggunakan dasar yang sama seperti halnya pelaporan internal. Segmen operasi dilaporkan dengan cara yang konsisten dengan pelaporan internal yang disampaikan kepada pengambil keputusan operasional. Dalam hal ini pengambil keputusan operasional yang mengambil keputusan strategis adalah Direksi.

u. Provisi dan Kontinjensi

Provisi diakui jika, sebagai akibat peristiwa masa lalu, Perusahaan dan Entitas Anak memiliki kewajiban kini yang bersifat hukum maupun konstruktif yang dapat diestimasi secara andal, dan kemungkinan besar arus keluar sumber daya yang mengandung manfaat ekonomi diperlukan untuk menyelesaikan kewajiban tersebut. Provisi ditentukan dengan mendiskontokan perkiraan arus kas masa depan, dengan suatu tingkat diskonto sebelum pajak yang mencerminkan penilaian pasar atas nilai waktu dari uang dan risiko yang terkait dengan liabilitas yang bersangkutan.

Provisi ditelaah pada setiap akhir periode pelaporan dan disesuaikan untuk mencerminkan estimasi terbaik yang paling kini. Jika arus keluar sumber daya untuk menyelesaikan kewajiban kemungkinan besar tidak terjadi, maka provisi dibatalkan.

Aset dan liabilitas kontinjensi tidak diakui dalam laporan keuangan konsolidasian. Liabilitas kontinjensi diungkapkan dalam laporan keuangan konsolidasian, kecuali arus keluar sumber daya yang mengandung manfaat ekonomi kemungkinannya kecil. Aset kontinjensi diungkapkan dalam laporan keuangan konsolidasian, jika terdapat kemungkinan besar arus masuk manfaat ekonomis akan diperoleh.

t. Segment Information

Entities disclose information that enable users of the financial statements to evaluate the nature and financial effects of the business activities and use "management approach" under which segment information is presented on the same basis as that used for internal reporting purposes. Operating segment is reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker has been identified as the board of directors that makes strategic decisions.

u. Provisions and Contingencies

Provision is recognized if, as a result of a past event, the Company and Subsidiaries have a present legal or constructive obligation that can be reliably estimated, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows, at a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provisions are reviewed at each end of reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

Contingent assets and liabilities are not recognized in the consolidated financial statements. Contingent liabilities are disclosed in the consolidated financial statements, unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are disclosed in the consolidated financial statements where an inflow of economic benefits is probable.

4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING

Penyusunan laporan keuangan konsolidasian, sesuai dengan Standar Akuntansi Keuangan di Indonesia, mewajibkan manajemen untuk membuat pertimbangan dan estimasi yang memengaruhi jumlah-jumlah yang dilaporkan dalam laporan keuangan. Sehubungan dengan adanya ketidakpastian yang melekat dalam membuat estimasi, hasil sebenarnya yang dilaporkan di masa mendatang dapat berbeda dengan jumlah estimasi yang dibuat.

Perusahaan dan Entitas Anak mendasarkan pertimbangan dan estimasinya pada parameter yang tersedia pada saat laporan keuangan disusun. Situasi mengenai perkembangan masa depan mungkin berubah akibat perubahan pasar atau situasi diluar kendali Perusahaan dan Entitas Anak. Perubahan tersebut dicerminkan dalam pertimbangan terkait pada saat terjadinya.

Pertimbangan dan estimasi berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Perusahaan dan Entitas Anak yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan konsolidasian:

Menentukan mata uang fungsional

Faktor-faktor yang dipertimbangkan dalam menentukan mata uang fungsional Perusahaan dan masing-masing Entitas Anak termasuk, antara lain, mata uang:

- yang paling memengaruhi harga jual barang dan jasa;
- dari negara yang kekuatan persaingan dan peraturannya sebagian besar menentukan harga jual barang dan jasa entitas;
- yang paling memengaruhi biaya tenaga kerja, bahan baku, dan biaya lain dari pengadaan barang atau jasa;
- yang mana dana dari aktivitas pendanaan dihasilkan; dan
- yang mana penerimaan dari aktivitas operasi pada umumnya ditahan.

Menentukan klasifikasi aset dan liabilitas keuangan

Perusahaan dan Entitas Anak menetapkan klasifikasi atas aset dan liabilitas tertentu sebagai aset keuangan dan liabilitas keuangan dengan mempertimbangkan apakah definisi yang ditetapkan PSAK No. 55 dipenuhi. Dengan demikian, aset keuangan dan liabilitas keuangan diakui sesuai dengan kebijakan akuntansi Perusahaan dan Entitas Anak seperti diungkapkan pada Catatan 3.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of consolidated financial statements, in conformity with Indonesian Financial Accounting Standards, requires management to make judgments and estimations that affect amounts reported therein. Due to the inherent uncertainty in making estimates, actual results reported in future periods may differ from those estimates.

The Company and Subsidiaries based its judgments and estimates on parameters available when the financial statements were prepared. Existing circumstances about future developments may change due to market changes or circumstances arising beyond the control of the Company and Subsidiaries. Such changes are reflected in the judgments as they occur.

The following judgments and estimates made by management in the process of applying the Company and Subsidiaries' accounting policies are those most likely to have significant effects on the amounts recognized in the consolidated financial statements:

Determining functional currency

The factors considered in determining the functional currency of the Company and each of its Subsidiaries include, among others, the currency:

- that mainly influences sales prices for goods and services;
- of the country whose competitive forces and regulations mainly determine the sales prices of its goods and services;
- that mainly influences labor, material and other costs of providing goods or services;
- in which funds from financing activities are generated; and
- in which receipts from operating activities are usually retained.

<u>Determining classification of financial assets and financial liabilities</u>

The Company and Subsidiaries determine the classification of certain assets and liabilities as financial assets and financial liabilities by judging if they meet the definition set forth in PSAK No. 55. Accordingly, the financial assets and financial liabilities are accounted for in accordance with the Company and Subsidiaries' accounting policies disclosed in Note 3.

4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Menentukan nilai wajar dan perhitungan amortisasi biaya perolehan dari instrumen keuangan

Perusahaan dan Entitas Anak mencatat aset dan liabilitas keuangan tertentu pada nilai waiar dan biava perolehan diamortisasi, yang mengharuskan penggunaan estimasi akuntansi. Sementara komponen signifikan atas asumsi yang digunakan dalam perhitungan amortisasi biaya perolehan ditentukan menggunakan bukti obyektif yang dapat diverifikasi, jumlah nilai wajar atau amortisasi dapat berbeda bila Perusahaan dan Entitas Anak menggunakan metodologi penilaian atau asumsi yang berbeda. Perubahan tersebut dapat memengaruhi secara langsung laba rugi Perusahaan dan Entitas Anak. Penjelasan lebih rinci diungkapkan dalam Catatan 42.

Menilai jumlah terpulihkan dari aset keuangan

Perusahaan dan Entitas Anak mengevaluasi akun piutang tertentu yang diketahui bahwa pelanggan tertentu tidak dapat memenuhi kewajiban keuangannya. Dalam hal tersebut, Perusahaan dan Entitas Anak menggunakan pertimbangan, berdasarkan fakta dan situasi yang tersedia, termasuk namun tidak terbatas pada, jangka waktu hubungan dengan pelanggan dan status kredit dari pelanggan berdasarkan catatan kredit dari pihak ketiga yang tersedia dan faktor pasar yang telah diketahui, untuk mencatat penyisihan spesifik atas pelanggan terhadap jumlah terutang guna mengurangi jumlah piutang yang diharapkan dapat diterima oleh Perusahaan dan Entitas Anak. Penyisihan spesifik ini dievaluasi kembali dan disesuaikan jika tambahan informasi yang diterima memengaruhi jumlah penyisihan atas penurunan nilai piutang. Penjelasan lebih rinci diungkapkan dalam Catatan 6.

Menilai penyisihan penurunan nilai pasar dan keusangan persediaan

Penyisihan penurunan nilai pasar dan keusangan persediaan diestimasi berdasarkan fakta dan situasi yang tersedia, termasuk namun tidak terbatas kepada, kondisi fisik persediaan yang dimiliki, harga jual pasar, estimasi biaya penyelesaian dan estimasi biaya yang timbul untuk penjualan. Provisi dievaluasi kembali dan disesuaikan jika terdapat tambahan informasi yang memengaruhi total yang diestimasi.

Pada tanggal 30 Juni 2018 dan 31 Desember 2017, Perusahaan dan Entitas Anak menilai bahwa tidak ada indikasi penurunan nilai pasar dan keusangan persediaan. PT INDAH KIAT PULP & PAPER Tbk

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

<u>Determining fair value and calculation of cost</u> <u>amortization of financial instruments</u>

The Company and Subsidiaries record certain financial assets and liabilities at fair value and amortized costs, which requires the use of accounting estimates. While significant components of assumptions used in the calculation of cost amortization were determined using verifiable objective evidence, the fair value or amortization amount would differ if the Company and Subsidiaries utilized different valuation methodology or assumptions. Such changes would directly affect the Company and Subsidiaries' profit or loss. Further details are disclosed in Note 42.

Assessing recoverable amounts of financial assets

The Company and Subsidiaries evaluate specific accounts receivable where they have information that certain customers are unable to meet their financial obligations. In these cases, the Company and Subsidiaries use judgment, based on available facts and circumstances, including but not limited to, the length of their relationship with the customer and the customer's current credit status based on any available third party credit reports and known market factors, to record specific provisions for customers against amounts due to reduce their receivable amounts to that the Company and Subsidiaries expect to collect. These specific provisions are re-evaluated and adjusted as additional information received affects the provision for impairment. Further details are disclosed in Note 6.

Assessing allowance for decline in market value and obsolescence of inventories

Allowance for decline in market value and obsolescence of inventories is estimated based on available facts and circumstances, including but not limited to, the inventories own physical condition, their market selling prices, estimated costs of completion and estimated costs to be incurred for their sales. The provisions are re-evaluated and adjusted as additional information received affects the amount estimated.

As of June 30, 2018 and December 31, 2017, the Company and Subsidiaries assessed that there was no indication of decline in market value and obsolescence of their inventories.

4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Menentukan metode penyusutan dan estimasi umur manfaat aset tetap

Biaya perolehan aset tetap disusutkan dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomisnya. Manajemen mengestimasi masa manfaat ekonomis aset tetap dua (2) tahun sampai dengan dua puluh lima (25) tahun. Ini adalah umur yang secara umum diharapkan dalam industri dimana Perusahaan dan Entitas Anak menjalankan bisnisnya. Perubahan tingkat pemakaian dan perkembangan teknologi dapat memengaruhi masa manfaat ekonomis dan nilai sisa aset, dan karenanya biaya penyusutan masa depan mungkin direvisi. Penjelasan lebih rinci diungkapkan dalam Catatan 13.

Menilai penurunan nilai aset nonkeuangan tertentu

PSAK No. 48 mensyaratkan bahwa penilaian penurunan nilai dilakukan pada aset nonkeuangan tertentu apabila terdapat kejadian atau perubahan keadaan yang mengindikasikan bahwa jumlah tercatat tidak dapat diperoleh kembali. Faktor-faktor yang dianggap penting oleh Perusahaan dan Entitas Anak yang dapat memicu penelaahan atas penurunan nilai adalah sebagai berikut:

- kinerja yang relatif kurang signifikan terhadap expected historical atau hasil operasional yang diharapkan dari proyek masa depan;
- (b) perubahan signifikan dalam cara penggunaan aset yang diperoleh atau strategi bisnis secara keseluruhan: dan
- (c) tren industri atau ekonomi yang negatif secara signifikan.

Kerugian akibat penurunan nilai diakui apabila jumlah tercatat aset nonkeuangan melebihi total yang dapat dipulihkan. Menentukan total yang dapat dipulihkan atas aset-aset tersebut membutuhkan estimasi atas arus kas yang diharapkan dapat dihasilkan dari penggunaan lanjutan dan disposisi akhir dari aset tersebut.

Pada tanggal 30 Juni 2018 dan 31 Desember 2017, Perusahaan dan Entitas Anak menilai bahwa tidak ada indikasi penurunan aset tetap dan aset tidak lancar lainnya. PT INDAH KIAT PULP & PAPER Tbk

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

<u>Determining depreciation method and estimated useful</u> <u>lives of fixed assets</u>

The costs of fixed assets are depreciated on a straightline basis over their estimated useful lives. Management properly estimates the useful lives of these fixed assets to be within two (2) years to twenty five (25) years. These are common life expectancies applied in the industries in which the Company and Subsidiaries conduct their business. Changes in the expected level of usage and technological development could impact on the economic useful lives and the residual values of these assets, and therefore future depreciation charges could be revised. Further details are disclosed in Note 13.

Assessing impairment of certain non-financial assets

PSAK No. 48 requires that an impairment review be performed on certain non-financial assets whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. The factors the Company and Subsidiaries consider important that could trigger an impairment review include the following:

- (a) significant underperformance relative to the expected historical or project future operating results:
- (b) significant changes in the manner of use of the acquired assets or the strategy for overall business; and
- (c) significant negative industry or economic trends.

An impairment loss is recognized whenever the carrying amount of a non-financial asset exceeds its recoverable amount. Determining the recoverable amount of such assets requires the estimation of cash flows expected to be generated from the continued use and ultimate disposition of such assets.

As of June 30, 2018 and December 31, 2017, the Company and Subsidiaries assessed that there was no indication of impairment of their fixed assets and other non-current assets.

4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Estimasi biaya dan liabilitas imbalan pascakerja

Penentuan liabilitas dan biaya imbalan pascakerja Perusahaan dan Entitas Anak bergantung pada pemilihan asumsi yang digunakan oleh aktuaris independen dalam menghitung jumlah-jumlah tersebut. Asumsi tersebut termasuk antara lain, tingkat diskonto, tingkat kenaikan gaji, tingkat pengunduran diri, tingkat cacat, usia pensiun dan tingkat mortalitas. Sementara Perusahaan dan Entitas Anak berkeyakinan bahwa asumsi tersebut adalah wajar dan sesuai, perbedaan signifikan pada hasil aktual atau perubahan signifikan dalam asumsi yang ditetapkan Perusahaan dan Entitas Anak dapat memengaruhi secara material liabilitas dan beban imbalan pascakerja. Penjelasan lebih rinci diungkapkan dalam Catatan 27.

Menentukan provisi atas pajak penghasilan

Pertimbangan signifikan dilakukan dalam menentukan provisi atas pajak penghasilan badan. Terdapat transaksi dan perhitungan tertentu yang penentuan pajak akhirnya adalah tidak pasti sepanjang kegiatan usaha normal. Perusahaan dan Entitas Anak mengakui liabilitas atas pajak penghasilan badan yang diharapkan berdasarkan estimasi apakah akan terdapat tambahan pajak penghasilan badan yang akan jatuh tempo.

Perusahaan dan Entitas Anak menelaah aset pajak tangguhan pada setiap tanggal pelaporan dan mengurangi jumlah tercatat sepanjang tidak ada kemungkinan bahwa laba kena pajak memadai untuk mengompensasi sebagian atau seluruh aset pajak tangguhan. Perusahaan dan Entitas Anak juga menelaah waktu yang diharapkan dan tarif pajak atas pemulihan perbedaan temporer dan menyesuaikan pengaruh atas pajak tangguhan yang sesuai. Penjelasan lebih rinci diungkapkan dalam Catatan 36.

Mengevaluasi perjanjian sewa

Perusahaan dan Entitas Anak menandatangani perjanjian sewa sebagai *lessee*. Manajemen melakukan penilaian dalam menentukan apakah semua risiko signifikan dan manfaat kepemilikan aset sewaan dialihkan kepada Perusahaan dan Entitas Anak. Sewa guna usaha dimana Perusahaan dan Entitas Anak memperoleh seluruh risiko signifikan dan manfaat kepemilikan aset sewaan diklasifikasikan sebagai sewa pembiayaan, jika sebaliknya maka diklasifikasikan sebagai sewa operasi.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

Estimate of post-employment benefits expense and liability

The determination of the Company and Subsidiaries' liability and expense for post-employment benefits is dependent on its selection of certain assumptions used in calculating such amounts. These assumptions include among others, discount rate, salary increment rate, turnover rates, disability rate, retirement age and mortality rate. While the Company and Subsidiaries believe that their assumptions are reasonable and appropriate, significant differences in the Company and Subsidiaries' actual results or significant changes in the Company and Subsidiaries' assumptions may materially affect its post-employment liability and expense. Further details are disclosed in Note 27.

Determining provision for income tax

Significant judgment is involved in determining provision for corporate income tax. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company and Subsidiaries recognize liabilities for expected corporate income tax based on estimates as to whether additional corporate income tax will be due.

The Company and Subsidiaries review their deferred tax assets at each reporting date and reduce the carrying amounts to the extent it is no longer probable that sufficient taxable profits will be available to allow all or part of the deferred tax asset to be utilized. The Company and Subsidiaries also review the expected timing and tax rates upon reversal of temporary differences and adjust the impact of deferred tax accordingly. Further details are disclosed in Note 36.

Evaluating lease agreements

The Company and Subsidiaries have entered into lease agreements as lessee. The management exercises judgment in determining whether all significant risk and rewards of ownership of the leased property are transferred to the Company and Subsidiaries. Leases wherein the Company and Subsidiaries acquire all significant risks and rewards of ownership of the leased property are accounted for as finance leases, otherwise they are accounted for as operating leases.

4. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Penjelasan lebih rinci diungkapkan dalam Catatan 21.

Menilai pengendalian atau pengaruh signifikan pada entitas lain

Perusahaan menilai apakah pengaruh signifikan pada entitas lain melalui:

- adanya dewan perwakilan Perusahaan pada entitas lain dan pernyataan kontraktual.
- Perusahaan merupakan pemegang saham mayoritas dengan kepentingan ekuitas yang lebih besar dari pemegang saham lainnya.
- memiliki kekuatan untuk berpartisipasi dalam pengambilan keputusan keuangan dan operasi.

Penjelasan lebih rinci diungkapkan dalam Catatan 12.

Mengevaluasi provisi dan kontinjensi

Perusahaan dan Entitas Anak terlibat dalam berbagai proses hukum dan pajak. Manajemen melakukan penilaian untuk membedakan antara provisi dan kontinjensi terutama melalui konsultasi dengan penasehat hukum Perusahaan dan Entitas Anak yang menangani proses hukum dan pajak tersebut. Perusahaan dan Entitas Anak mempersiapkan provisi yang sesuai untuk proses hukum saat ini atau kewajiban konstruktif, jika ada, sesuai dengan kebijakan provisinya. Dalam pengakuan dan pengukuran provisi, manajemen mengambil risiko dan ketidakpastian.

Dalam situasi tertentu, Perusahaan dan Entitas Anak tidak dapat menentukan secara pasti jumlah liabilitas pajak mereka pada saat ini atau masa depan karena proses pemeriksaan, atau negosiasi dengan otoritas perpajakan. Ketidakpastian timbul terkait dengan interpretasi dari peraturan perpajakan yang kompleks serta jumlah dan waktu dari penghasilan kena pajak di masa depan. Dalam menentukan jumlah yang harus diakui terkait dengan liabilitas pajak yang tidak pasti, Perusahaan dan Entitas Anak menerapkan pertimbangan yang sama yang akan mereka gunakan dalam menentukan jumlah cadangan yang harus diakui sesuai dengan PSAK No. 57. Perusahaan dan Entitas Anak membuat analisa untuk semua posisi pajak terkait dengan pajak penghasilan untuk menentukan jika liabilitas pajak untuk manfaat pajak yang belum diakui harus diakui. Penjelasan lebih rinci diungkapkan dalam Catatan 36.

Assessing control or significant influence on other entities

The Company has assessed its significant influence in other entities through:

- the presence of the board representative of the Company and the contractual term.
- the Company is the majority shareholder with a greater interest than other shareholders.
- has the power to participate in the financial and operating policy decisions.

Further details are disclosed in Note 12.

Evaluating provisions and contingencies

The Company and Subsidiaries are involved in various legal and tax proceedings. The managements exercise their judgment to distinguish between provisions and contingencies mainly through consultation with the Company and Subsidiaries' legal counsel handling those proceedings. The Company and Subsidiaries set up appropriate provisions for their present legal or constructive obligations, if any, in accordance with their policies on provisions. In recognizing and measuring provisions, the managements take risk and uncertainty into account.

In certain circumstances, the Company and Subsidiaries may not be able to determine the exact amount of their current or future tax liabilities due to ongoing investigations by, or negotiations with, the taxation authority. Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. In determining the amount to be recognized with respect to an uncertain tax liability, the Company and Subsidiaries apply similar considerations as they would use in determining the amount of a provision to be recognized in accordance with PSAK No. 57. The Company and Subsidiaries perform an analysis of all tax positions related to income taxes to determine if a tax liability for unrecognized tax benefit should be recognized. Further details are disclosed in Note 36.

Berdasarkan PSAK No. 68, "Pengukuran Nilai Wajar", terdapat tingkatan hirarki nilai wajar sebagai berikut:

- (a) harga kuotasian (tidak disesuaikan) dalam pasar aktif untuk aset atau liabilitas yang identik (Level 1),
- (b) input selain harga kuotasian yang termasuk dalam Level 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung (misalnya harga) atau secara tidak langsung (misalnya derivasi dari harga pasar) (Level 2), dan
- (c) input untuk aset atau liabilitas yang bukan berdasarkan data pasar yang dapat diobservasi (input yang tidak dapat diobservasi) (Level 3).

Nilai wajar untuk investasi jangka pendek berdasarkan kuotasi nilai pasar pada tanggal pelaporan yang termasuk dalam tingkat 1.

Based on PSAK No. 68, "Fair Value Measurement," there are levels of fair value hierarchy as follows:

- (a) quoted prices (unadjusted) on active markets for identical assets or liabilities (Level 1),
- (b) inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from market prices) (Level 2), and
- (c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

The fair value of the short-term investment is based on quoted market prices at the reporting date which is included in Level 1.

42. INSTRUMEN KEUANGAN (Lanjutan)

Metode dan asumsi berikut ini digunakan untuk mengestimasi nilai wajar untuk setiap kelompok instrumen keuangan sepanjang nilai tersebut dapat diestimasi:

Aset dan liabilitas keuangan jangka pendek:

 Instrumen keuangan jangka pendek dengan jatuh tempo satu tahun atau kurang (kas dan setara kas, piutang usaha, piutang lain-lain - pihak ketiga, aset lancar lainnya, pinjaman bank jangka pendek, pembiayaan musyarakah jangka pendek, utang usaha, utang lain-lain, beban masih harus dibayar dan liabilitas jangka panjang yang akan jatuh tempo dalam waktu satu tahun).

Instrumen keuangan ini sangat mendekati jumlah tercatat mereka karena jatuh tempo mereka dalam jangka pendek.

Aset dan liabilitas keuangan jangka panjang:

 Liabilitas keuangan jangka panjang dengan suku bunga variabel (piutang pihak berelasi, liabilitas sewa pembiayaan, pinjaman bank jangka panjang dan utang murabahah dan pembiayaan musyarakah jangka panjang).

Nilai wajar dari liabilitas keuangan ini ditentukan dengan mendiskontokan arus kas masa datang menggunakan suku bunga yang berlaku dari transaksi pasar yang dapat diamati untuk instrumen dengan persyaratan, risiko kredit dan jatuh tempo yang sama (Level 2).

 Instrumen keuangan yang tidak dikuotasikan dalam pasar aktif (piutang pihak berelasi dan utang pihak berelasi).

Instrumen keuangan ini dicatat berdasarkan nilai nominal dikurangi penurunan nilai karena nilai wajarnya tidak dapat diukur secara andal. Adalah tidak praktis untuk memperkirakan nilai wajar dari instrumen keuangan dikarenakan tidak memiliki jangka waktu pembayaran yang tetap meskipun tidak diharapkan dapat diselesaikan dalam waktu dua belas (12) bulan setelah akhir periode pelaporan.

 Aset dan liabilitas keuangan jangka panjang lainnya (wesel bayar dan pinjaman jangka panjang dan medium-term notes).

Estimasi nilai wajar didasarkan pada nilai diskonto dari arus kas masa datang yang disesuaikan untuk mencerminkan risiko pihak lawan (untuk aset keuangan) dan risiko kredit Perusahaan dan Entitas Anak (untuk liabilitas keuangan) dan menggunakan suku bunga pasar.

42. FINANCIAL INSTRUMENTS (Continued)

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to do so:

Short-term financial assets and liabilities:

 Short-term financial instruments with remaining maturities of one year or less (cash and cash equivalents, trade receivables, other receivables third parties, other current assets, short-term bank loans, short-term musyarakah financing, trade payables, other payables, accrued expenses, and current maturities of long-term liabilities).

These financial instruments approximate to their carrying amounts largely due to their short-term maturities.

Long-term financial assets and liabilities:

 Long-term variable-rate financial liabilities (finance lease liabilities, long-term bank loans and long-term murabahah payable and musyarakah financing).

The fair value of these financial liabilities is determined by discounting future cash flows using applicable rates from observable current market transactions for instruments with similar terms, credit risk and remaining maturities (Level 2).

 Financial instruments not quoted on an active market (due from related parties and due to related parties).

These financial instruments are carried at their nominal amount less any impairment losses since their fair value cannot be reliably measured. It is not practical to estimate the fair value of these financial instruments because there are no fixed repayment terms although they are not expected to be settled within twelve (12) months after the end of the reporting period.

 Other long-term financial assets and liabilities (notes payable and long-term loans and medium-term notes).

Estimated fair value is based on discounted value of future cash flows adjusted to reflect counterparty risk (for financial assets) and the Companies and Subsidiaries' own credit risk (for financial liabilities) and using market rates.

b. Risiko nilai tukar mata uang asing

Informasi mengenai aset dan liabilitas moneter Perusahaan dan Entitas Anak dalam mata uang asing disajikan pada Catatan 38. Perusahaan dan Entitas Anak memonitor dan mengelola risiko ini dengan menyepadankan liabilitas keuangan dalam mata uang asing dengan aset keuangan dalam mata uang asing terkait dan melakukan pembelian atau penjualan mata uang asing saat diperlukan.

Jika pada tanggal 30 Juni 2018, Dolar AS melemah/menguat 5% terhadap mata uang Rupiah Indonesia, Euro Eropa, Yen Jepang dan Yuan Cina dengan seluruh variabel lain tetap, laba rugi dan ekuitas untuk periode yang berakhir pada tanggal 30 Juni 2018 akan menjadi lebih rendah/tinggi sebesar sekitar USD34,5 juta.

c. Risiko tingkat suku bunga

Perusahaan dan Entitas Anak didanai dengan berbagai pinjaman bank, surat utang dan obligasi yang dikenakan bunga. Oleh karena itu, eksposur Perusahaan dan Entitas Anak terhadap risiko pasar sehubungan dengan perubahan tingkat suku bunga terutama atas liabilitas jangka panjang serta aset dan liabilitas yang dikenakan bunga. Kebijakan Perusahaan dan Entitas Anak adalah untuk memperoleh tingkat suku bunga yang paling menguntungkan tanpa meningkatkan eksposur terhadap mata uang asing dengan mengelola biaya pinjamannya menggunakan kombinasi antara utang dan liabilitas jangka panjang dengan tingkat suku bunga tetap dan mengambang.

Jika pada tanggal 30 Juni 2018, suku bunga lebih tinggi/rendah 50 basis poin dengan semua variabel lain tetap, maka laba rugi dan ekuitas untuk periode yang berakhir pada tanggal 30 Juni 2018 akan menjadi lebih rendah/tinggi sekitar USD1,4 juta, yang terutama timbul sebagai akibat beban bunga yang lebih tinggi/rendah atas pinjaman dengan suku bunga mengambang.

b. Foreign exchange risk

The Company and Subsidiaries are exposed to foreign currency exchange rate movements primarily in Indonesian Rupiah, European Euro, Japanese Yen and Chinese Yuan on certain expenses, assets and liabilities that arise from financing activities and daily operations. Information about monetary assets and liabilities of the Company and Subsidiaries in foreign currencies are disclosed in Note 38. The Company and Subsidiaries monitor and manage the risk by matching the foreign currency financial liabilities with relevant foreign currency financial assets and buying or selling foreign currencies at spot rates when necessary.

If as of June 30, 2018, US Dollar had weakened/strengthened by 5% against Indonesian Rupiah, European Euro, Japanese Yen and China Yuan, with all other variables held constant, profit or loss and equity for the period ended June 30, 2018 would have been decreased/increased by approximately USD34.5 million.

c. Interest rate risk

The Company and Subsidiaries are financed through interest-bearing bank loans, notes and bonds. Therefore, the Company and Subsidiaries' exposures to market risk for changes in interest rates relates primarily to their long-term borrowings and interest-bearing assets and liabilities. The Company and Subsidiaries' policies are to obtain the most favorable interest rates available without increasing their foreign currency exposure by managing their interest cost using a mixture of fixed and floating rate debts and long-term borrowings.

If as of June 30, 2018, the interest rates had been 50 basis points higher/lower with all variables held constant, profit or loss and equity for the period ended June 30, 2018 would have been lower/higher by approximately USD1.4 million, mainly as a result of higher/lower interest expense on floating rate loans.
